

USER MANUAL · VERSION 1.0

Workshop Accounting & Billing System

Poori Guide — Hinglish mein

Motor rewinding aur trading workshop ke liye ek hi jagah par billing, stock, udhaar, staff aur poora accounting record.

YEH MANUAL KISKE LIYE HAI

Shop owner, accountant, manager, counter clerk aur staff — un sab ke liye jo is application ko rozana chalte hain. Isme koi technical jaankari zaroori nahi hai.

KYA COVER HOTA HAI

17 modules

Sales, Purchase, Jobs, Items, Stock, Customers, Vendors, Expenses, Transactions, Staff, Insights, Accounting, Opening balances, Settings, Users, Roles, History

KAISE PADHEIN

Shuru se, ya zaroorat ke hisaab se

Chapter 2 pehli baar setup ke liye. Baaki chapters kisi bhi order mein padh sakte hain.

BHASHA

Simple Hinglish

Accounting ke mushkil shabd Chapter 10 mein aasaan bhasha mein samjhaye gaye hain.

MADAD CHAHIYE

Chapter 11 aur 12

Common galtiyen, error messages aur FAQ — sab ek jagah.

Introduction — Yeh Application Kya Hai

Yeh application ek **workshop ka poora hisaab-kitaab** ek hi jagah par rakhne ke liye banaya gaya hai. Motor rewinding ka kaam, parts ki bikri, supplier se kharid, customer ka udhaar, shelf par pada stock, staff ki salary aur mahine ke end ka profit — sab kuch ek hi screen se chalta hai.

1.1 Yeh kis problem ko solve karta hai

Ek workshop mein aam taur par teen-chaar alag-alag records chalte hain: ek bill book, ek udhaar ki copy, ek stock ka register aur ek accountant ka software. Problem yeh hai ki yeh chaaron kabhi aapas mein match nahi karte. Bill book mein motor bik gaya, lekin stock register mein abhi bhi shelf par pada hai. Customer ne paise de diye, lekin udhaar ki copy mein entry reh gayi.

Yeh application us problem ko is tarah khatam karta hai:

- **Ek entry, sab jagah asar.** Jab aap ek invoice post karte hain, usi waqt stock kam hota hai, customer ka udhaar badhta hai, GST record hota hai aur profit ka hisaab update hota hai. Aapko yeh alag-alag jagah likhna nahi padta.
- **Koi bhi figure “store” nahi hoti.** Customer kitna deta hai, shelf par kitna maal hai, mahine ka profit kitna hai — yeh sab har baar entries se ginn kar nikala jata hai. Isliye yeh figures kabhi purani ya galat nahi ho sakti.
- **Posted entry badalti nahi.** Jo bill ek baar books mein chala gaya, use edit nahi kiya ja sakta. Galti sudharne ka tareeka alag hai (Chapter 11 dekhein), aur us tareeke se purana record bhi bacha rehta hai aur naya bhi — jo ek sahi accounting record ki pehchaan hai.

1.2 Application ki khaas baatein

KHOABI	AAPKE LIYE ISKA MATLAB
Ek hi home page	Koi left-side menu nahi. Sab kaam Dashboard ke cards se hota hai, aur module usi page par khulta hai. Page kabhi reload nahi hota.
Kaam beech mein nahi tootta	Aap ek module se doosre module mein ja kar wapas aa sakte hain — aadha bhara hua form, search, filter sab waise ka waisa milta hai.
GST apne aap	Tax rate item se aata hai, aur CGST+SGST ya IGST ka faisla dono taraf ke state code se hota hai. Aapko kuch calculate nahi karna.
Stock ka sahi cost	Har cheez ka average cost khud nikalta hai (weighted average). Isse har bikri par asli profit dikhta hai, andaaza nahi.
Kaun kya dekh sakta hai	Role ke hisaab se. Counter clerk bill bana sakta hai lekin salary nahi dekh sakta. Yeh sirf screen par chhupana nahi — server par bhi rok hai.
Customer ko invoice	Print bhi kar sakte hain aur ek link bana kar bhej bhi sakte hain. Us link mein customer ko aapka buying price kabhi nahi dikhta.

DHYAAN DEIN

Yeh application ek **workshop** ke liye bana hai — matlab ek workshop ka data doosre workshop se poori tarah alag rehta hai. Aap jo bhi dekhte hain, wo sirf aapke workshop ka hai.

1.3 Yeh manual kaise padhein

AAP KAUN HAIN	KAHAN SE SHURU KAREIN
Owner — naya setup kar rahe hain	Chapter 2, phir Chapter 4 poora (Settings → Accounting → Opening balances). Yeh ek baar ka kaam hai lekin sabse zaroori hai.
Counter par baithne wale	Chapter 2.4 (module kaise chalta hai), phir Chapter 6 — Sales, Purchase aur Jobs.
Accountant	Chapter 4.3 (Accounting), Chapter 6.5 (Transactions), Chapter 7.2 (Insights) aur Chapter 10 (terms).
Manager	Chapter 7 (Staff aur Insights) aur Chapter 9 (workflows).
Kuch atak gaya hai	Seedha Chapter 11 (troubleshooting) ya Chapter 12 (FAQ).

Manual mein aap yeh nishaan dekhenge:

TIP

Kaam aasaan karne ka tareeka — kuch aisa jo aapka waqt bachaye.

DHYAAN RAKHEIN

Aisi baat jahan log aksar galti karte hain.

KABHI NA KAREIN

Aisi galti jo baad mein sudharna mushkil ya namumkin hai.

NOTE

Extra jaankari — zaroori nahi lekin samajhne mein madad karti hai.

UDAHARAN

Ek asli example, numbers ke saath.

Getting Started — Shuruaat

2.1 Sign in kaise karein

- 1 Browser mein workshop ka web address kholein. Sabse pehle aapko **shop ki apni website** dikhegi (services, contact wagairah) — yeh public page hai, koi bhi dekh sakta hai.
- 2 Usi page par **Sign in** par click karein. Ek chhota sign-in box khulega — naya page nahi.
- 3 Apna **email** aur **password** daalein aur sign in karein.
- 4 Sign in hote hi aap seedhe **Dashboard** par pahunch jayenge.

NOTE

Agar aapne kabhi **/login** address bookmark kiya hai, to wo bhi chalega — wo apne aap shop ke page par sign-in box khol dega.

Password galat ho jaye to

Kai baar galat password daalne par account thodi der ke liye **lock** ho jata hai. Screen par likha aayega ki kitni der baad dobara koshish karni hai. Yeh “galat password” wale message se alag hota hai — iska matlab hai ki ab thoda intezaar karna padega. Agar aap password bhool gaye hain, to workshop ke owner se kahein ki wo **Users** module se aapka password badal dein.

2.2 Passkey — fingerprint ya face se sign in

Password ke alawa aap apne phone ya laptop ka **fingerprint, face ya screen lock** istemaal kar ke sign in kar sakte hain. Ise **passkey** kehte hain.

- 1 Pehle normal tareeke se password se sign in karein.
- 2 Upar dayein kone mein apne account icon par click karein aur **Sign-in security** chunein.
- 3 Wahan se is device ka passkey add karein. Device aapse fingerprint ya screen lock maangega.
- 4 Agli baar se sign-in box par passkey se seedhe andar aa sakte hain.

CHEEZ	PASSWORD SE	PASSKEY SE
Session kitne din chalta hai	7 din	90 din
Chori ho sakta hai?	Haan — koi dekh sakta hai ya likha hua mil sakta hai	Nahi — device se bandha hota hai
Naye device par	Chalega	Us device ka apna passkey banana padega

NOTE

Koi **Keep me signed in** ka checkbox jaan-boojh kar nahi rakha gaya. Lamba session sirf passkey se milta hai, kyunki wahi surakshit hai. Password ka option kabhi hataya nahi jayega — naye device par pehli baar aur passkey kho jaane par wahi aapka raasta hai.

2.3 Dashboard — aapka ek hi home page

Sign in ke baad jo screen milti hai wahi poore application ka ghar hai. Isme do hisse hain:

HISSA	KYA HAI
Topbar (sabse upar)	Bayein taraf Home aur breadcrumb (aap abhi kahan hain). Dayein taraf account icon — jisme Workshop (settings), Sign-in security aur Sign out milte hain.
Card grid (beech mein)	Har module ka ek card. Card par uska naam aur ek line ka matlab likha hota hai. Card par click karte hi wo module wahin khul jata hai.

Cards do groups mein hote hain — **roz ka kaam** (Sales, Expenses, Jobs, Transactions, Items, Stock, Purchase, Customers, Vendors, Accounting, Insights, Staff) aur **Administration** (Users, Roles, Settings, Opening balances, History). Jo cards aapko dikhte hain wo aapke role par depend karta hai — jiska aapko haq nahi, uska card hi nahi dikhta.

DHYAAN RAKHEIN

Topbar mein ek search box dikhta hai (“*Search bills, customers, items...*”). **Yeh box abhi kaam nahi karta.** Kisi bhi cheez ko dhoondhne ke liye us module ko kholein aur uske **apne search box** ka istemaal karein — wo har module mein maujood hai aur poori tarah kaam karta hai.

2.4 Har module ek hi tarah se chalta hai

Yeh application ki sabse kaam ki baat hai: **saare modules bilkul ek jaise chalte hain**. Ek baar seekh liya to har module aata hai. Chaar level hote hain:

LEVEL	KYA DIKHTA HAI	KIS KAAM KE LIYE
0 — Dashboard	Cards ki grid	Ghar. Yahin se sab shuru hota hai.
1 — Workspace	Poora module, usi page par	Create form, ya list with search aur filters
2 — Drawer	Dayein se aane wala panel	Ek record ki poori detail aur uske actions
3 — Confirm	Chhota box beech mein	“Pakka?” — sirf ek faisla

Create form aur list — ek waqt mein ek

Module kholte hi aapko **create form** milta hai, kyunki module kholne ki sabse aam wajah kuch naya likhna hoti hai. Heading ke dayein kone mein ek button hota hai:

- Form par: **Show list (37)** — bracket mein number batata hai ki abhi kitne records hain. Click karte hi form ki jagah table aa jati hai.
- List par: **Add customer** / **Add product** / **Create account** jaisa button — wapas form par le jata hai.

TIP

Button hamesha batata hai ki aap **kahan jayenge**, yeh nahi ki kya chhupega. Isliye aap kabhi table par phans nahi sakte — wapas jaane ka raasta hamesha samne dikhta hai.

Kaam kabhi kho nahi sakta

- Aadha bhara form, list ka search, filter aur load kiya hua data — sab bacha rehta hai. Module se nikal kar wapas aane par sab waisa hi milta hai.
- Ek record save karne ke baad aap **form par hi rehte hain**. Fields khali ho jate hain aur cursor pehle box mein aa jata hai — taaki lagatar kai entries ki ja sakein. Naya record highlight ho jata hai, jo aapko agli baar list kholne par dikhega.
- List sirf pehli baar **Show list** dabane par load hoti hai. Jo module aap sirf likhne ke liye kholte hain, uski list kabhi load hi nahi hoti — isse application tez rehta hai.

Escape aur Back button

Escape dabane par ek level peeche jate hain, ek baar mein ek:

Confirm box → Drawer → List → Module → Dashboard

Browser ka **Back** button bhi theek waise hi kaam karta hai, aur har module ka address bar mein apna link banta hai — matlab aap kisi module ka link bookmark ya share kar sakte hain.

KABHI NA KAREIN

Kuch save karne ke baad page ko **refresh (F5)** mat karein. Iski zaroorat kabhi nahi padti — screen apne aap update ho jati hai. Refresh karne se aapka aadha bhara hua kaam ja sakta hai.

2.5 Pehli baar setup — sahi order

Naye workshop mein kaam is order mein karein. Yeh order zaroori hai — har step apne se pehle wale step par tika hota hai.

STEP	MODULE	KYA KARNA HAI
1	Settings	Workshop ka naam, GSTIN, address, financial year, timezone aur books start date bharein. Sabse pehle yeh, kyunki GSTIN se tax ka hisaab tay hota hai.
2	Accounting	Chart of accounts dekh lein. 15 zaroori accounts pehle se bane hote hain. Apne kharche ke accounts (jaise Workshop Rent) yahan add karein.
3	Items	Category, brand aur unit set karein, phir apne products daalein.
4	Customers / Vendors	Purane customer aur supplier daalein (ya baad mein bill banate waqt bhi daal sakte hain).
5	Opening balances	Go-live wale din ka stock, udhaar, lena-dena aur cash declare karein. Yeh ek baar ka kaam hai.
6	Staff	Designations aur employees daalein — agar attendance aur payroll chalana hai.

STEP	MODULE	KYA KARNA HAI
7	Users	Apne staff ke logins banayein aur unhe role dein.
8	—	Ab roz ka kaam shuru: Sales, Purchase, Jobs, Expenses.

DHYAAN RAKHEIN

Opening balances Step 5 par hai, Step 1 par nahi. Opening balance daalne ke liye pehle items, customers aur vendors ka hona zaroori hai — warna file ki rows kisi cheez se judengi nahi.

Application Overview — Poora Naksha

3.1 Saare modules ek nazar mein

Dashboard par jo cards dikhte hain, unka poora list yahan hai. “Kaun dekh sakta hai” column batata hai ki card dikhne ke liye kya haq (permission) chahiye.

ROZ KA KAAM

CARD	KIS KAAM KE LIYE	KAUN DEKH SAKTA HAI
Sales	Customer ko bill (invoice) banana, aur wapas aaye maal ka credit note	Owner, Data entry
Expenses	Rent, bijli, chai-paani — dukaan chalane ka kharcha	Owner, Data entry
Jobs	Bench par pade motor — aane se lekar delivery aur bill tak	Owner, Data entry
Transactions	Receipt (paisa aaya), Payment (paisa gaya), aur journal voucher	Owner, Data entry
Items	Catalogue — aap kya bechte, lagate aur charge karte hain	Owner, Data entry
Stock	Shelf par kitna hai, kya khatam ho raha hai (sirf dekhne ke liye)	Owner, Data entry
Purchase	Supplier se aaya maal aur uska bill, aur wapas bheje maal ka debit note	Owner, Data entry
Customers	Kaun kharidta hai aur kitna udhaar hai	Owner, Data entry
Vendors	Kaun supply karta hai aur unka kitna dena hai	Owner, Data entry
Accounting	Chart of accounts, balances aur trial balance	Owner (figures ke liye ledger ka haq bhi chahiye)
Insights	Business kaisa chal raha hai + Day book, P&L, GST summary, parked drafts	Owner
Staff	Employees, attendance, salary aur advances	Sirf Owner

ADMINISTRATION

CARD	KIS KAAM KE LIYE	KAUN DEKH SAKTA HAI
Settings	Workshop ki pehchaan, financial year aur trading rules	Owner
Opening balances	Go-live ke din books ki halat	Owner
Users	Kaun sign in kar sakta hai aur kis role se	Owner

CARD	KIS KAAM KE LIYE	KAUN DEKH SAKTA HAI
Roles	Har role kya kar sakta hai (Owner ke liye sirf padhne ke liye)	Owner
History	Kisne kya badla aur kab	Sirf Owner

NOTE — ABHI BAND MODULES

Do cards abhi **band** hain aur dashboard par nahi dikhte: **Uploads** (bill ki photo rakhna) aur **Workshops** (platform par saare workshops sambhalna). Yeh adhoore nahi hain — inka kaam poora ban chuka hai, bas inki screen abhi naye “form aur list” wale tareeke mein nahi dhali gayi hai. Jab tak yeh on nahi hote, bill ki photo rakhne ka koi tareeka application mein nahi hai.

3.2 Modules aapas mein kaise jude hain

Yeh samajhna sabse zaroori hai. Har module akela nahi hai — ek jagah entry karne se doosri jagah apne aap asar padta hai. Yahan poori tasveer hai:

Items product ki pehchaan deta hai → **Purchase** maal laata hai → **Stock** badhta hai aur average cost banta hai

Stock → **Sales** / **Jobs** maal issue karte hain → **Stock** ghatta hai, profit banta hai

Sales / **Purchase** → **Customers** / **Vendors** ka outstanding badalta hai

Transactions paisa lete/dete hain → outstanding ghatta hai

Sab kuch → **Accounting** (ledger) → **Insights** (reports)

JAB AAP YEH KARTE HAIN	TO YEH APNE AAP HOTA HAI	KAHAN DIKHTA HAI
Purchase bill post karte hain	Stock badhta hai, average cost naya banta hai, GST input record hota hai, vendor ka dena badhta hai	Stock, Vendors, Accounting, Insights
Sales invoice post karte hain	Stock ghatta hai, cost of goods nikalta hai, GST output banta hai, customer ka udhaar badhta hai	Stock, Customers, Accounting, Insights
Receipt post karte hain	Cash/bank badhta hai, customer ka udhaar ghatta hai	Customers, Accounting
Job ka bill banate hain	Sales invoice ban jata hai — upar wala sab hota hai — aur job ke parts “billed” ho jate hain	Jobs, Sales, Stock, Customers
Expense record karte hain	Kharcha book hota hai, cash/bank ghatta hai	Accounting, Insights (P&L)
Stock count record karte hain	Shelf ka figure sudharta hai aur farak COGS mein jata hai	Stock, Accounting, Insights
Payroll post karte hain	Salary kharcha book hota hai, advance kat-ta hai, cash/bank ghatta hai	Staff, Accounting, Insights

TIP

Agar kisi module ka data purana lag raha hai, to ghabrayein nahi. Jab aap kisi doosre module mein kuch likhte hain, to yeh application khud-ba-khud jaan leta hai ki kaunsi screen ab purani ho gayi — aur agli baar us screen ko kholne par wo apne aap taaza data le aati hai. Aapko refresh karne ki zaroorat nahi.

3.3 Roles — kaun kya kar sakta hai

Har user ko ek **role** milta hai. Role hi tay karta hai ki kaunse cards dikhenge aur unke andar kya kiya ja sakta hai. Teen role pehle se bane hote hain:

ROLE	KAUN	KYA KAR SAKTA HAI
OWNER	Workshop ka maalik	Apne workshop ka sab kuch — books, log, settings, staff ki salary aur History. Doosre workshops ka kuch nahi.
DATA_ENTRY	Counter clerk / data entry	Roz ka kaam: bill, purchase, job, receipt, payment, expense. Naya customer aur naya item bhi bana sakta hai.
ADMIN	Platform admin (software chalane wale)	Poore platform ka. Kisi ek workshop ki books iske paas nahi hoti.

DATA_ENTRY ko kya nahi milta — aur kyun

NAHI MILTA	WAJAH
Staff module (poora)	Yeh bharse ki baat nahi, <i>privacy</i> ki baat hai. Kaun kitni salary leta hai, yeh counter par baithne wale ko jaanne ki zaroorat nahi.
Insights aur Accounting ke figures	Din ka kaam likhna aur poore business ki haalat padhna — do alag cheezein hain.
History	Trail mein yehi likha jata hai ki data entry user ne kya kiya. Use padhna alag haq hai.
Customer/item/job delete karna	Delete sirf tab possible hai jab record se kabhi koi len-den na hua ho — yani yeh safai ka kaam hai, roz ka nahi.
Settings aur Opening balances	Yeh setup ka kaam hai, roz ka nahi.

NOTE

Agar aapko koi card nahi dikh raha jo dikhna chahiye, to owner se apna role check karvayein (**Users** module mein). Card chhupana sirf screen ki baat nahi — server bhi har request par yahi rok lagata hai, isliye link seedhe kholne se bhi kaam nahi banega.

3.4 Document ki teen halat — Draft, Posted, Reversed

Har bill, voucher aur receipt ki ek **status** hoti hai. Yeh samajhna zaroori hai:

STATUS	MATLAB	KYA KAR SAKTE HAIN
Draft	Likha gaya lekin books mein nahi gaya. Na stock hila, na koi balance badla.	Edit karein, post karein, ya phenk dein (discard)
Posted	Books mein chala gaya. Stock hil gaya, balance badal gaya, GST record ho gaya.	Edit <i>nahi</i> kar sakte. Correct ya Reverse kar sakte hain.
Reversed	Post hone ke baad rad kiya gaya. Ulti entry daal kar cancel kiya gaya.	Kuch nahi — sirf dekh sakte hain. Record mita nahi, dono entries rehti hain.

DHYAAN RAKHEIN

Sirf Sales aur Purchase mein draft ban sakta hai. Receipt, Payment, journal voucher, expense aur payroll — inme koi draft nahi hota. Jo paisa hil gaya wo ek *haqeeqat* hai, adhoora kaam nahi. Inhe post karna hi padta hai ya bilkul nahi banana.

Setup Modules — Ek Baar Ka Kaam

Is chapter ke teen modules aap shuru mein ek baar set karte hain. Inhe theek se set karna sabse zaroori hai, kyunki poore application ke figures inhi par khade hote hain.

4.1 Settings — Workshop ki apni jaankari

Yeh kya hai aur kyun zaroori hai

Yahan aap batate hain ki aapka workshop *kaun* hai aur kis *niyam* se chalta hai. Yeh module sirf naam-pata bharne ki jagah nahi — yahan ki har setting kisi na kisi hisaab ko badalti hai.

Kab kholte hain

Shuru mein ek baar. Uske baad tabhi jab kuch sach mein badle — naya GSTIN mile, address badle, ya aap credit ke din badalna chahein.

Screen kaisi hai

Yeh **ek hi record** wala module hai, isliye ismein “Show list” nahi hota. Kholte hi seedha form khulta hai, teen hisson mein: **Identity**, **Books** aur **Rules**. Neeche `Save settings` ka button hai.

Kya bharna hai

IDENTITY — PEHCHAAN

FIELD	KYA BHAREIN	ISKA ASAR
Workshop name	Poora naam, jaisa bill par chhapna chahiye	Har invoice aur document par
GSTIN	15 character ka GST number, jaise <code>27AAPFU0939F1ZV</code>	Bahut zaroori. Isse aapka state code nikalta hai, aur usi se tay hota hai ki bill par CGST+SGST lagega ya IGST
State code	Do digit — jaise <code>27</code> . GSTIN daalne par apne aap bhar jata hai	Wahi — tax ka type
Address	Shop ka pata	Invoice par chhapta hai
Handle	Fixed hai, badla nahi ja sakta	Workshop ka andaruni pehchan-naam. Naam badalne se yeh nahi badalta
Currency	Rupees	Sab jagah dikhne wala symbol

BOOKS — KITAABON KA NIYAM

FIELD	KYA BHAREIN	ISKA ASAR
Financial year starts in	Aam taur par April (India)	Saare period reports isi se kate jate hain. Ise baad mein badalne se <i>har purani report</i> naye tareeke se kat jayegi
Timezone	Aapka local timezone	Transaction ki date aur Day Book isi se chalta hai

FIELD	KYA BHAREIN	ISKA ASAR
Books start date	Jis din se aap is application mein hisaab rakh rahe hain	Is date se pehle ki koi transaction post nahi hogi. Aisi koshish par BOOKS_CLOSED aata hai

RULES — TRADING KE NIYAM

FIELD	KYA BHAREIN	ISKA ASAR
Payment due days	Kitne din mein customer ko paisa dena hai — jaise 30 . Cash-only dukaan hai to khali chhod dein	Insights ke “Money owed” mein purana udhaar isi se ginn-na jata hai. Khali hone par bucket invoice ki date se gine jate hain, aur screen aapko bata deti hai
Allow negative stock	Tick na karein (default). Tick tabhi karein jab bill pehle bante hain aur supplier ka bill baad mein aata hai	Bina tick ke: shelf par maal na hone par bill post nahi hoga. Tick ke saath: bill post ho jayega aur stock minus mein chala jayega
Round off invoices	Tick karein agar aap paise chhod kar poore rupee mein charge karte hain	₹6,701.10 ka bill ₹6,701 ho jayega aur 10 paise Round Off account mein chale jayenge. Tax aur taxable value nahi badalte

DHYAAN RAKHEIN — GSTIN SABSE PEHLE

Agar GSTIN galat hai, to state code galat hoga, aur phir **har bill par galat tax** lagega — CGST+SGST ki jagah IGST ya ulta. Bill banane se pehle GSTIN check kar lein. GSTIN badalne par purane posted bills nahi badalte (aur yeh sahi hai) — sirf aage wale bills par asar padta hai.

NOTE

Yeh screen save karne par Insights aur reports apne aap taaza ho jate hain, kyunki financial year, timezone aur books start date hi tay karte hain ki report kis period ki hai.

4.2 Accounting — Chart of Accounts aur Trial Balance

Yeh kya hai

Chart of accounts yani “khaton ki list” — wo saare khaate jismein paisa jata aur aata hai: Cash in Hand, Bank Account, Sales, Inventory, Rent, wagairah. Har transaction kisi na kisi khaton mein jati hai, aur yeh module un khaton ki list hai.

Kyun aur kab

Setup ke waqt ek baar dekhne ke liye, aur uske baad jab bhi aapko **apna naya kharcha ka khaata** banana ho — jaise “Workshop Rent” ya “Vehicle Fuel”. Poore application mein naya account banane ki yeh *ekloti* jagah hai.

Kaise chalta hai

- 1 Card kholte hi **naya account banane ka form** khulta hai.
- 2 **Show list** dabane par do view milte hain, upar ek period picker ke saath: **chart** (type ke hisaab se grouped) aur **trial balance**.
- 3 Kisi bhi row par click karne se drawer khulta hai — us account ka balance aur uski entries.

- 4 Drawer se hi account edit bhi kiya ja sakta hai.

Naya account banate waqt kya bharna hai

FIELD	KYA BHAREIN	NOTE
Type	Asset, Liability, Equity, Income ya Expense	Yeh sabse pehle chunein — isi se code ka range tay hota hai
Code	Number, jaise 5300	Type ke band mein hona chahiye (neeche table dekhein)
Name	Jaise <i>Workshop Rent</i>	Workshop mein ek hi baar ho sakta hai
Description	Ismein kya kya aayega	Optional, lekin baad mein bahut kaam aata hai

CODE KE BAND — NUMBER GALAT RANGE MEIN NAHI HO SAKTA

TYPE	CODE RANGE	NORMAL BALANCE	KIS STATEMENT MEIN
Asset (jo aapke paas hai)	1000–1999	Debit	Balance sheet
Liability (jo aapko dena hai)	2000–2999	Credit	Balance sheet
Equity (maalik ka hissa)	3000–3999	Credit	Balance sheet
Income (aamdani)	4000–4999	Credit	Profit & loss
Expense (kharcha)	5000–5999	Debit	Profit & loss

Galat band ka code daalne par **ACCOUNT_CODE_OUT_OF_BAND** aayega. Wajah saaf hai — 1500 number wala kharcha har report mein assets ke beech chala jata, aur galti balance sheet galat dikhne par hi pakadti.

Jo 15 accounts pehle se bane hote hain

CODE	ACCOUNT	KIS KAAM KA
1010	Cash in Hand	Golak ka cash
1020	Bank Account	Bank aur cheque
1030	UPI / Wallet	UPI se aaya-gaya paisa
1200	Inventory	Shelf par pade maal ki keemat
1300	GST Input	Kharid par diya GST (claim karne layak)
1400	Sundry Debtors	Customers se lena baaki (receivable)
1500	Staff Advance	Staff ko diya gaya advance
2100	Sundry Creditors	Vendors ko dena baaki (payable)
2200	GST Output	Bikri par liya GST (sarkar ko dena)
3000	Opening Balance Equity	Go-live par maalik ka hissa
4000	Sales	Maal bech kar aayi aamdani
4100	Service Income	Labour / rewinding se aayi aamdani
5000	COGS	Beche gaye maal ki लागत

CODE	ACCOUNT	KIS KAAM KA
5100	Misc Expense	Phutkar kharcha
5200	Salary Expense	Staff ki tankhwah

NOTE

Cash, Bank aur UPI alag-alag khaate hain, jaan-boojh kar. Isse aap golak ka cash till se, bank ka balance passbook se aur UPI ka app se milaan kar sakte hain. Ek hi “Cash/Bank” khaata hota to yeh teenon milaan namumkin ho jate.

Trial balance — yeh kya batata hai

Trial balance ek list hai jismein har account ka total debit aur total credit hota hai. Sahi books mein dono taraf ka total **barabar** hota hai. Yeh screen us barabari ko saaf-saaf likh kar batati hai — do columns dekh kar aapko khud andaza nahi lagana padta.

DHYAAN RAKHEIN

Chart view par jo **search box** aur **archived filter** hai, wo **trial balance par jaan-boojh kar chhup jate hain**. Trial balance ke totals server par *har* account par bante hain (archived bhi), isliye rows filter karne se columns neeche wale totals se match karna band ho jate.

Account archive karna vs delete karna

KYA	KAB POSSIBLE HAI	KYA HOTA HAI
Archive	Hamesha	Account naye transactions mein nahi dikhta, lekin uski purani entries aur balance waise ke waise rehte hain
Delete	Sirf jab account mein kabhi koi entry na hui ho	Row hat jati hai

Jo 15 accounts pehle se bane hain, unhe delete nahi kiya ja sakta — unke bina posting hoti hi nahi. Unka **naam badalna** allowed hai (jaise “UPI / Wallet” ko “PhonePe” kar dena), aur isse kuch nahi tootta.

TIP

Kaunsa account chunein? Seedha niyam: jo cheez **bechne ya lagane** ke liye kharidi — wo Purchase hai. Jo **dukaan khuli rakhne** ke liye kharchi — wo Expense hai. Rent, bijli, phone, chai — sab Expense.

4.3 Opening Balances — Purana Hisaab Andar Laana

Yeh kya hai aur kyun

Agar aapka workshop pehle se chal raha hai, to aap zero se shuru nahi karte. Shelf par maal pada hai, customers ka udhaar hai, supplier ka dena hai aur golak mein cash hai. Jab tak yeh sab application ko nahi bataya jata, **har figure utni hi galat rahegi jitna pehle se maujood tha**.

Yeh application ki ekloti screen hai jiska kaam **ek hi baar** istemaal hona hai.

Screen kaisi hai

Kholte hi **declaration form** khulta hai. Uske saath hi form par teen cheezein dikhti hain:

Owner's stake at go-live, Books open on aur Opening transactions in the books. Yeh isliye form par hain, list par nahi — kyunki jo insaan apni poori purani haalat declare karne ja raha hai, use yehi teen cheezein commit karne se pehle aur commit karte hi dekhni hoti hain.

Show list ke peeche ab tak ke saare imports ka record rehta hai.

File ka format

Sirf **CSV** file chalti hai (Excel se “Save as CSV” kar lein). Columns yeh hain:

EXAMPLE FILE

```
kind,name,variant,type,quantity,unit_cost,amount,account
stock,Ball Bearing,6204,part,10,120.00,,
stock,Copper Wire,22 SWG,bulk_material,40,720.00,,
stock,Induction Motor,5 HP / 3 ph / 1440 RPM,motor,2,8200.00,,
receivable,Sharma Motors,,,,,15000.00,
payable,Kohli Traders,,,,,32000.00,
balance,,,,,40000.00,Cash in Hand
```

KIND	KIS CHEEZ KE LIYE	KAUNSE COLUMN BHARNE HAIN
stock	Shelf par pada maal	name, variant, type, quantity, unit_cost
receivable	Customer se lena baaki	name (customer ka naam), amount
payable	Vendor ko dena baaki	name (vendor ka naam), amount
balance	Kisi bhi khate ka balance — jaise cash	amount, account (khate ka naam)

TIP — FILE BANANE MEIN AASANI

Parser kaafi samajhdaar hai. Columns kisi bhi order mein ho sakte hain, chhote-bade akshar chalte hain, khali rows chal jati hain, ₹1,24,500.00 jaisa format chalta hai aur (2,000) ko minus maan liya jata hai. Aapko file “saaf” karne mein waqt lagane ki zaroorat nahi.

Kaise chalayein — do button ka anushasan

- 1 File chunein ya CSV text ko box mein paste karein.
- 2 Check it dabayein. Kuch post **nahi** hoga — sirf screen par dikhega ki kya-kya banega, kaunsi row kis cheez se judi, kya skip hogi aur kahan error hai.
- 3 Sabse upar Owner's stake at go-live dekhein — yani declare kiye gaye assets minus jo dena hai. **Yeh number aapko pehchana hua lagana chahiye.** Agar kam lag raha hai, to zaroor kuch file mein chhoot gaya hai.
- 4 Sab theek lage to Post these balances dabayein.

DHYAAN RAKHEIN

Post ka button tab tak band rehta hai jab tak **box mein maujood text par** preview na chala ho. Agar aap preview ke baad file badal dete hain, to button phir band ho jata hai. Yeh jaan-boojh kar hai — purane preview ke bharose nayi file post nahi honi chahiye.

Ek hi cheez do baar post nahi hogi

- Wahi file dobara chadhane par application pehchan leta hai aur **OPENING_ALREADY_IMPORTED** kehta hai.
- Agar aap file thodi badal kar dobara chadhate hain, tab bhi — **jis variant, party ya account ka opening pehle se hai, wo skip ho jata hai** aur skip ki ginti report mein aati hai. Yeh rok file par nahi, books par lagi hai, isliye ise chakma diya nahi ja sakta.

KABHI NA KAREIN

Opening stock ko **purchase bill bana kar** andar mat laayein. Isse teen galtiyan ek saath hoti hain: aapka pehla mahina ek bhaari kharid dikhta hai, aap us GST ka claim karte hain jo saalon pehle claim ho chuka tha, aur ek aisa supplier ban jata hai jise kabhi paisa diya hi nahi gaya. Hamesha yeh module hi istemaal karein.

Aadha post nahi hota

Agar file ki *ek bhi* row mein gadbad hai, to **poori file rok di jati hai** — kuch bhi post nahi hota. Yeh jaan-boojh kar hai: aadha post hone par aapko yeh pata karne ke liye poora go-live haath se milana padta, jo kaam yeh import bachane ke liye hi bana hai.

Master Data — Items, Stock, Customers, Vendors

Yeh chaar modules aapke “master” hain — yani wo buniyadi jaankari jiske upar roz ke bills bante hain. Ek baar theek se bana lein, phir bill banana bahut tez ho jata hai.

5.1 Items — Aapka Catalogue

Yeh kya hai

Items wo list hai jo batati hai ki aap **kya bechte, kya lagate aur kis cheez ka charge karte hain**. Ismein motor bhi aayega, bearing bhi, copper wire bhi aur rewinding ka labour bhi.

Sabse zaroori baat — do level

Yeh module do level mein kaam karta hai, aur yehi ismein sabse important cheez hai:

LEVEL	KYA HAI	UDAHARAN
Item (parivaar)	Cheez ka khandaan — jismein HSN code, GST rate aur unit hote hain	“3-Phase Induction Motor”
Variant (asli cheez)	Wo cheez jo asli mein bikti hai — jiska SKU, price aur stock hota hai	“5 HP / 3 ph / 1440 RPM”

KYUN DO LEVEL

Kyunki ek hi HSN code aur ek hi GST rate motor ki chalis ratings par lagta hai. Agar wo chalis baar likha jata, to kabhi na kabhi do jagah alag ho jata — aur jo galat hota wo GST return par chala jata. Doosri taraf, **koi customer “ek 3-phase motor” nahi maangta** — wo “5 HP wala” maangta hai. Isliye price aur stock *variant* par hote hain.

Catalogue setup — pehle yeh

Product banane se pehle ek baar apni **vocabulary** set karein. Yeh [Catalogue setup](#) se khulta hai:

MASTER	KYA HAI	UDAHARAN
Category	Cheez ka kism, aur uska template — default unit, HSN, GST rate, aur stock rakhta hai ya nahi	Motor, Bearing, Wire, Labour
Attributes	Har category ke apne sawaal, jinke jawab variant deta hai	Motor ke liye: HP, Phase, RPM
Brands	Cheez kiski hai	Crompton, SKF
Units	Cheez ginne kaise jati hai	PCS, KG, HRS

TIP

Agar aapki dukaan kal se pump ya LED bechna shuru kar de, to aap khud ek nayi category bana kar uske apne fields (jaise *Head*, *LPM*) bana sakte hain — kisi developer ki zaroorat nahi. Category banate hi wo create form par milne lagti hai.

KABHI NA KAREIN

Brand ko free text mein mat likhein. Brand ki apni list hai. Agar log type karne lage to “Crompton”, “crompton” aur “Crompton Greaves” teen alag brand ban jayenge aur filter unhe alag hi samjhega.

Naya product banana — kya bharna hai

FIELD	KYA BHAREIN	NOTE
Product name	Jaise <i>Crompton 3-Phase Induction Motor</i>	Zaroori
Category	List mein se chunein	Zaroori — isse HSN, GST, unit aur variant ke fields aate hain
Brand	List mein se chunein, ya wahin + se nayi banayein	Optional
Code	Aapka apna short code, jaise MOT-3PH	Optional
Counted in	Unit — PCS, KG, HRS	Category se apne aap bhar jata hai
HSN code	4 se 8 digit. Service ke liye SAC	Category se apne aap bhar jata hai
GST rate	Percentage mein — 18 likhein, 0.18 nahi	Category ka default aa jata hai
Price includes tax	Tick karein agar aap jo rate quote karte hain usmein GST pehle se shaamil hota hai	Bill par har line par badla ja sakta hai
Stock tracking	Tick karein agar iska stock ginna hai	Labour ke liye tick na karein — ek ghanta bikte waqt hi bana jata hai

Variant ke fields

FIELD	KYA BHAREIN	NOTE
Specification	Category ke attributes ke jawab — jaise HP = 5, Phase = 3, RPM = 1440	Yehi variant ki pehchaan hai
Label	Screen par dikhne wala naam	Specification se apne aap ban jata hai
SKU	Jaise MOT-5HP-1440	Workshop mein ek hi baar ho sakta hai
Barcode	Scan ya type	Optional
Selling price	Aap kitne mein bechte hain	Sales bill par apne aap aa jata hai
Purchase price	Andaza — aap kitne mein kharidte hain	Yeh aapka cost nahi hai. Asli cost purchase bill se banta hai. Yeh sirf opening stock ke liye kaam aata hai
Reorder level	Itna reh jaye to <i>order karne ka waqt hai</i>	Jaise 20
Minimum stock	Itne se neeche gaye to <i>abhi ja kar laana hai</i>	Jaise 5
Opening stock / cost	Shuruaat mein kitna tha aur kis daam par	Sirf naye product ke liye

REORDER LEVEL AUR MINIMUM STOCK KA FARAK

Yeh do alag sawaal hain. **Reorder level** = “ab order kar dena chahiye” (jaise 20). **Minimum stock** = “ab kaam rok kar laana padega” (jaise 5). Application dono ko alag-alag dikhata hai, aur jo zyada khatre ki baat hai wahi badge par aati hai.

Item ka drawer — char tabs

TAB	KYA DIKHTA HAI
Overview	Product ki poori detail aur uska rolled-up stock
Variants	Saare variants, unka stock, average cost aur status
Stock History	Har wo transaction jisse is cheez ka stock hila
Activity	Is record mein kisne kya badla

KABHI NA KAREIN

Items screen se seedhe stock ki quantity badalne ki koshish mat karein — aisa koi box hai hi nahi, jaan-boojh kar. Stock badalne ka ek hi tareeka hai: **count record karna** (Section 5.2 dekhain). Aisa isliye hai taaki shelf ka har badlav books mein bhi utar sake.

5.2 Stock — Shelf Par Kya Hai

Yeh kya hai

Stock module **sirf dekhne ke liye** hai: kitna maal hai, uski keemat kya hai, kya khatam ho raha hai. Ismein kuch banaya nahi jata, isliye yeh module kholte hi seedha **list** par khulta hai — koi create form nahi.

Screen par kya milta hai

- Upar tiles: Variants, Stock value, Low stock, Out of stock — aur Below minimum ek pill ke roop mein.
- Search box aur filters: category, status (In stock / Low / Out / Negative / At or below reorder / Below minimum), aur archived variants shaamil karein ya nahi.
- Table: item, variant, on hand, average cost, value aur status.

Paanch status — aur unki tarteeb

Ek variant ka status hamesha in paanch mein se ek hota hai. Jab do baatein ek saath sach hon, to **jo zyada bura hai wahi dikhta hai**, is order mein:

Negative

→

Out of stock

→

Below minimum

→

Low stock

→

In stock

STATUS	MATLAB AUR KYA KAREIN
Negative	Books keh rahi hain ki shelf par minus maal hai. Yeh data ki galti hai, kharidne ki nahi — koi purchase bill entry hona reh gaya hai. Pehle wo daalein.
Out of stock	Zero. Aaj ka kaam ruk sakta hai — sabse pehle yeh mangayein.
Below minimum	Apne farsh se neeche. Aaj hi laana hai.
Low stock	Reorder level par ya usse neeche. Is hafte order kar dein.

STATUS	MATLAB AUR KYA KAREIN
In stock	Theek hai.

Average cost kya hota hai

Application har cheez ka **weighted average cost** rakhta hai — yani jo maal shelf par hai, uska ausat daam.

UDAHARAN

Aapne 10 kg copper ₹700/kg par kharida — 10 kg, keemat ₹7,000.

Phir 10 kg aur kharida ₹800/kg par — ab 20 kg, keemat ₹15,000.

Ab average cost **₹750/kg** hai — na 700, na 800.

Ab 3 kg nikala: keemat mein se ₹2,250 gaya, aur bache 17 kg abhi bhi ₹750/kg par.

Yaad rakhein: **average sirf maal aane par badalta hai**, jaane par nahi. Yeh sahi hai — maal bechne se baaki bache maal ka daam nahi badal jata.

Stock count record karna

Jab aap shelf gin kar dekhte hain ki books se alag hai, to ise sudharne ka ek hi raasta hai:

- 1 Stock list mein us variant ki row par **Record a count** kholein.
- 2 **Count on the shelf** mein wo number likhein jo aapne **gin kar dekha**.
- 3 Date daalein aur note likhein — jaise *Stock-take, March*.
- 4 Agar maal zyada mila hai to **What the found stock cost** mein uska daam likhein.
- 5 **Post the correction** dabayein.

NOTE

Aap wo number likhte hain jo **shelf par hai**, farak nahi. Application khud farak nikalta hai aur ek document post karta hai. Isi wajah se stock aur books kabhi alag nahi ho sakte — har badlav ke peeche ek document hota hai.

DHYAAN RAKHEIN

Kam mila hua maal (shrinkage) P&L mein alag se nahi dikhta — wo COGS mein chala jata hai. Yeh jaan-boojh kar hai, taaki gross margin asli se behtar na dikhe. Kitna maal kam ya zyada mila, yeh dekhne ke liye **Insights → Stock** kholein. Wahan “kam mila” aur “zyada mila” alag-alag dikhaye jate hain, ek doosre mein cancel kar ke nahi.

5.3 Customers aur Vendors

Do card, lekin ek hi list

Customers aur **Vendors** do alag cards hain, lekin dono ke peeche **ek hi table** hai. Yeh baat is trade ke liye bahut zaroori hai: jo dukaan aapse rewind motor kharidti hai, wahi aapko scrap copper bech sakti hai.

YEH KAISE KAAM KARTA HAI

Aisa insaan **ek hi record** rehta hai, do nahi. Wo dono lists mein dikhta hai, aur uski row par likha hota hai “*Also a vendor*” ya “*Also a customer*”. Uska ledger bhi ek hi hota hai — dono taraf ka lena-dena ek saath.

KABHI NA KAREIN

Ek hi party ke **do record** mat banayein (jaise “Sharma Traders” customer mein aur “Sharma Traders” vendor mein). Isse ek balance do hisson mein bant jata hai aur dono aadhe sahi lagte hain — kabhi milaye nahi jate. Application aapko rokega bhi (neeche dekhein).

Naya record banate waqt kya bharna hai

FIELD	KYA BHAREIN	NOTE
Name	Poora naam	Zaroori. Workshop mein ek hi baar ho sakta hai
Phone	Mobile number	Optional lekin bahut kaam ka
Email	Email	Optional
GSTIN	Unka GST number	Optional. Isse state code nikalta hai aur tax ka type tay hota hai
Address	Shop / plot, area, city, pincode	Optional
Notes	Payment terms, site contact — jo bhi yaad rakhna ho	Optional

YAHAN ROLE KA KOI BOX NAHI HAI — AUR YEH JAAN-BOOJH KAR HAI

Aapko yeh nahi poocha jata ki yeh customer hai ya vendor. Jis module se aap likh rahe hain, wahi tay karta hai. Vendors se likha to vendor, Customers se likha to customer, aur purchase bill ke picker se likha to vendor. Supplier daalne wale insaan se yeh sawaal poochna hi galat hai.

Jab naam pehle se maujood ho

Agar aap aisa naam daalte hain jo pehle se hai, to application aapse **poochta hai** — “yeh vendor ke roop mein maujood hain, kya inhe customer bhi bana dein?” Haan kehne par **usi record** par doosra role lag jata hai. Yahi ek jagah hai jahan yeh sawaal matlab rakhta hai.

Do khaas rok

HALAT	KYA HOTA HAI
Wahi GSTIN kisi aur party par hai	Chetavni milti hai, lekin save ho jata hai — ek business ki do branch ho sakti hain. Aap dekh kar faisla karein
Naya vendor, jiska GSTIN aur phone dono kisi maujood vendor se milte hain	Rok di jati hai (PARTY_DUPLICATE_CONTACT). Yeh do branch nahi, ek hi supplier do baar hai. Agar sach mein doosri branch hai, to alag address daalein — tab save ho jayega

Outstanding — iska matlab samjhein

SCREEN PAR	MATLAB	RANG
They owe	Customer se itna lena baaki hai	Amber — peeche padna hai
You owe	Vendor ko itna dena baaki hai	Amber

SCREEN PAR	MATLAB	RANG
Paid ahead / in credit	Unhone zyada de diya — paisa <i>aapke</i> <i>paas</i> hai	Neela — peeche nahi padna
— (dash)	Kisi ne yeh figure maangi hi nahi. Yeh “zero” nahi hai	Grey

DHYAAN RAKHEIN

Agar koi party dono taraf hai, to uska receivable aur payable **alag-alag** dikhaye jate hain — jodkar ek number nahi banaya jata. “Wo aapko ₹40,000 dete hain aur aap unhe ₹38,000” do alag baatein hain jo alag-alag settle hoti hain. “₹2,000” sach to hai lekin kisi kaam ka nahi.

Party ka drawer

TAB	KYA DIKHTA HAI
Overview	Detail, receivable aur payable, aur lifetime figures
Sales / Purchase history	Unke saath ke saare bills
Payments	Unse aaye ya unhe diye gaye paise
Activity	Is record mein kisne kya badla

Drawer se **Statement** bhi khulta hai — unki har entry, date ke hisaab se, running balance ke saath. Statement hamesha **donor** taraf ka hota hai, chahe aapne use Customers se khola ho ya Vendors se.

Archive vs Delete

KYA	KAB POSSIBLE	KYA HOTA HAI
Archive	Hamesha	Naye bill ke pickers mein nahi dikhte, lekin poora ledger bacha rehta hai
Delete	Sirf jab unke saath kabhi koi transaction na hui ho (draft bhi nahi)	Row hat jati hai

Jis party ke saath len-den ho chuka hai, use delete nahi kiya ja sakta (**PARTY_IN_USE**) — warna uski entries se naam hi gayab ho jata. Archive karein.

Roz Ka Kaam — Sales, Purchase, Jobs, Expenses, Transactions

Yeh paanch modules aapka rozana ka kaam hain. In sab mein ek hi **document form** chalta hai, isliye ek baar Sales seekh liya to Purchase aur Jobs ka bill apne aap aa jata hai.

6.1 Bill ka form — sab jagah ek hi

Sales invoice, Purchase bill aur Job ka bill — teeno ek hi form se bante hain. Sirf yeh badalta hai ki party customer hai ya supplier, aur rate pehle se bhara hua aata hai ya nahi.

Form ke hisse

HISSA	KYA KARTA HAI	NOTE
Party picker	Customer ya supplier chunein. Naam type karte hi list aati hai	Naya banane ke liye <button>+ Add</button>
Date	Document ki date	Books start date se pehle nahi ja sakti
Item picker	Item dhoondhein — naam, code, SKU ya HSN se	Naya item wahin bana sakte hain
Lines table	Item, Qty, Rate, Discount, Amount	Har line par <button>Remove</button>
+GST / incl toggle	Rate ke bagal mein — batata hai ki rate mein tax shaamil hai ya nahi	Har line par alag ho sakta hai
Bill discount	Poore bill par chhoot — rupees mein ya percent mein	Toggle se badlein
Payment split	Abhi kitna mila aur kaise — Cash, Bank, UPI, Cheque	<button>On credit</button> matlab abhi kuch nahi mila
Notes	Jaise <i>Rewind for pump motor, site 4</i>	Optional. Search mein bhi milta hai
Totals panel	Dayein taraf chipka rehta hai — taxable, GST, total	Yeh figures server se aati hain

TOTAL KAUN GINTA HAI

Totals aapka browser nahi ginta — wo server se aate hain, usi code se jo bill ko asli mein post karta hai. Isliye jo screen par dikha, bill par bhi bilkul wahi aayega. Isme paise ka ek bhi farak nahi ho sakta.

+GST aur incl — yeh sabse zaroori toggle hai

Counter par log do tarah se rate bolte hain:

AAP KEHTE HAIN	TOGGLE	MATLAB
“Das hazaar plus GST”	<button>+GST</button>	₹10,000 par 18% lagega → customer ₹11,800 dega
“Gyarah aath sau, sab milakar”	<button>incl</button>	₹11,800 mein se hi GST nikala jayega → taxable ₹10,000, tax ₹1,800

Dono taraf se aakhir mein wahi teen figures bante hain. Item par jo default set hai wahi aata hai, lekin aap **har line par** badal sakte hain — ek hi bill par printed-price wala part aur “plus tax” wala labour dono aa sakte hain.

KABHI NA KAREIN — PURCHASE PAR SABSE KHATARNAAK GALTİ

Agar supplier ne MRP-inclusive rate diya hai aur aap use **+GST** par daal dete hain, to **poora tax aapke stock ki keemat mein jud jata hai — hamesha ke liye.** ₹700/kg ka copper ₹826/kg par shelf par chadh jayega, uske baad ka har margin galat hoga, aur kisi bhi screen par yeh galti dikhegi nahi. Purchase bill daalte waqt yeh toggle zaroor check karein.

Discount ke do tareeke

- **Line par discount** — sirf us line par, rupees ya percent mein.
- **Bill discount** — poore bill par. Yeh apne aap saari lines mein baant diya jata hai, *tax lagne se pehle.*

Bill discount lines mein isliye baanta jata hai kyunki GST har line par uske apne rate se lagta hai. Agar wo neeche footer par kaat diya jata, to customer se us paise par bhi GST liya jata jo unse maanga hi nahi gaya — aur GST return par ek aisi figure aati jise koi line support nahi karti.

Payment split — abhi kitna mila

Neeche **How this document is being settled** mein aap likhte hain ki abhi kitna paisa mila aur kis tareeke se. **Paid in full** shortcut poora amount bhar deta hai. **On credit** ka matlab hai abhi kuch nahi mila — poora udhaar.

MODE	KAUNSE ACCOUNT MEIN JATA HAI
Cash	Cash in Hand
Bank	Bank Account
UPI	UPI / Wallet
Cheque	Bank Account — cheque number likhna zaroori hai

Cheque ka number isliye zaroori hai kyunki uske bina bank statement se milaan nahi ho sakta, bounce hone par peecha nahi kiya ja sakta aur stop nahi karvaya ja sakta — aur yeh sab tabhi chahiye hota hai jab kuch galat ho chuka ho.

Post karna

- 1 **Post the bill** dabayein.
- 2 Ek confirm box khulega jismein poori detail hogi — **Post this bill?**
- 3 Confirm karte hi bill books mein chala jayega, stock hil jayega aur party ka balance badal jayega.

TIP — ADHOORA BILL BACH JATA HAI

Agar aapka bill aadha bana hai aur aap kahin aur chale jate hain, to wo apne aap **save** rehta hai (draft ki tarah, browser mein). Wapas aane par wahi bill mil jayega. Naye se shuru karna ho to **Start again** dabayein.

6.2 Sales — Customer Ko Bill

Kab kholte hain

Jab bhi kuch bikta hai — counter par ya kisi customer ko. Yeh module dashboard par sabse pehle hai kyunki sabse zyada isi ka istemaal hota hai.

Sales ki apni khaas baatein

BAAT	KYUN
Rate pehle se bhara aata hai	Aapne khud selling price set kiya hai, to counter par dobara type karne ki zaroorat nahi. Galti ho bhi jaye to sudharna aasaan hai
Customer chunte hi unka udhaar dikhta hai	“Yeh pehle se ₹42,000 dete hain” — yeh jaanne ka aakhri mauka yahi hai. Bill post hone ke baad udhaar dene ka faisla ho chuka
Kaam kisne kiya, yeh bhi likh sakte hain	Neeche Who did this work? mein — jaise “Ramesh ne fit kiya, Sunil ne winding ki”

Bill post hone ke baad

Post karte hi do cheezein hoti hain:

- Form **khali ho jata hai** aur cursor customer wale box mein aa jata hai — agla bill turant bana sakein.
- Uske upar **customer wali invoice copy** khul jati hai, jismein **Print**, **Share** aur **Next invoice** hote hain.

Invoice print karna aur bhejna

ACTION	KYA HOTA HAI	KISE CHAHIYE
Print	Invoice usi page se print hoti hai — koi nayi window nahi khulti	Sirf padhne ka haq
Share	Ek link banta hai jo customer ko bheja ja sakta hai	Likhne ka haq

SHARE LINK KE BAARE MEIN

- Link ki **koi expiry nahi** — customer invoice apne paas rakhta hai. Aap use band karna chahein to *revoke* karein.
- Revoke karne ke baad wo purana link hamesha ke liye band ho jata hai. Dobara share karne par **naya** link banta hai.
- Agar invoice reverse kar di gayi, to link apne aap kaam karna band kar deta hai.
- Customer ki copy mein **aapka cost ya margin kabhi nahi dikhta** — yeh technically possible hi nahi hai.

Invoice ke drawer se kya kar sakte hain

INVOICE KI HALAT	KYA KAR SAKTE HAIN
Draft	Post karein, ya Discard karein
Posted — na paisa mila, na maal wapas aaya	Collect payment, Accept return, Correct , Repeat, Print, Share, Reverse
Posted — kuch paisa mil gaya ya kuch maal wapas aa gaya	Collect payment, Accept return, Repeat, Print, Share, Reverse (Correct ab nahi)
Posted — poora settle	Accept return, Repeat, Print, Share, Reverse
Reversed	Sirf band karein — print bhi nahi

Jaise hi invoice par kuch bhi lag jata hai (payment ya credit note), **Correct hat jata hai** — kyunki wo receipt ya credit note ek cancel ho chuke bill par lagi reh jati.

Paisha collect karna

Invoice ke drawer se **Collect payment** kholein. Yahan ka paisha **seedha isi invoice** par lagta hai — chahe koi purani invoice bhi khuli ho. Yeh sahi hai: jo insaan invoice khol kar paisha le raha hai, uska matlab *yehi* invoice hai.

Paid in full yahan poore total ka nahi, **jitna abhi baaki hai** utna bharta hai.

Maal wapas aana — Credit note

Accept return se credit note banta hai. Jitna maal wapas aaya utna:

- stock wapas shelf par chadh jata hai — **usi cost par jis par gaya tha**,
- customer ka udhaar utna kam ho jata hai,
- us par liya gaya GST bhi wapas ho jata hai.

Credit notes usi list par dikhte hain jismein invoices hain — kyunki “kya becha” aur “kya wapas aaya” ek hi customer ke baare mein ek hi sawaal hai.

Correct aur Repeat

BUTTON	KYA KARTA HAI
Correct	Purani invoice ko form mein wapas laata hai. Aap sudhar kar post karte hain — purani apne aap reverse ho jati hai aur nayi ban jati hai, ek hi step mein. Upar ek banner batata rehta hai ki aap kis bill ko sudhar rahe hain
Repeat	“Wahi cheezein dobara” — purani invoice ki lines ek naye bill mein aa jati hain. Purani invoice bilkul waisi ki waisi rehti hai. Regular customer ke liye sabse kaam ka button

CORRECT KABHI-KABHI MANA HO JATA HAI

Agar aapki invoice ke baad us item ki nayi kharid aa gayi hai (jisse average cost badal gaya), to **Correct rok diya jata hai** — **REVISION_WOULD_RESTATE_COST**.

Wajah: sale us din ke average cost par gayi thi, aur wo figure kisi document par likhi hi nahi hai. Reverse karne par maal purane cost par wapas aata, aur nayi invoice naye cost par jati — dono cancel nahi hote, aur farak COGS mein chhup jata hai.

Iska koi “phir bhi karo” button nahi hai — aur nahi hona chahiye. Sahi tareeka: **credit note** se maal wapas lein, phir **nayi invoice** banayein. Do saaf documents, do sahi cost par.

6.3 Purchase — Supplier Se Aaya Maal

Kab kholte hain

Jab supplier ka bill aata hai. Yeh module Sales ka bilkul ulta aaina hai — wahi form, sirf do baatein alag.

Do khaas farak

FARAK	WAJAH
Rate ka box khali aata hai	Yahan galat rate hamesha ke liye galat rehta hai. Jo rate aap yahan likhte hain wahi stock ka cost ban jata hai, aur baad mein use sudharne ka koi tareeka nahi. Supplier ka bill saamne hi hota hai, isliye guess karne ki zaroorat hi nahi
Margin ka panel nahi hota	Kharid par koi margin hota hi nahi

NOTE

Rate box ke neeche **abhi ka average cost** dikhta hai — sirf dekhne ke liye, bhara hua nahi. Isse aap ek nazar mein dekh sakte hain ki daam badla hai ya nahi. Ise bhar dene se log tab dabate hi aage nikal jate aur galat cost chadh jata.

Purchase bill post hone par kya hota hai

- Stock **badh jata hai**, aur line ki taxable value par shelf par chadhta hai.
- Us aane se hi **naya average cost** banta hai.
- **GST Input** record hota hai — jo aap claim kar sakte hain.
- Vendor ko dena **badh jata hai** (jitna abhi nahi diya).

Purchase drawer se kya kar sakte hain

BILL KI HALAT	KYA KAR SAKTE HAIN
Draft	Post karein, ya Discard karein
Posted — na paisa diya, na maal wapas gaya	Record payment, Correct , Return to vendor, Reverse
Posted — kuch diya ya kuch wapas gaya	Record payment, Return to vendor, Reverse
Posted — poora settle	Return to vendor, Reverse
Reversed	Sirf band karein

TIP

Purchase par **Correct** Sales se zyada aasan hai. Supplier ka bill apna cost khud batata hai, isliye reverse aur repost karne par Inventory bilkul wahin wapas aa jata hai. 20 ki jagah 30 aaye the — seedha Correct karein.

Debit note — maal wapas bhejna

Return to vendor se debit note banta hai. Stock utna kam ho jata hai, vendor ko dena utna ghat jata hai aur GST input bhi adjust ho jata hai. Debit notes usi list par dikhte hain jismein bills hain.

6.4 Jobs — Bench Par Pade Motor

Yeh kya hai

Yeh workshop ka **asli kaam** hai. Baaki har module kisi paise ki baat karta hai; yeh module ek **cheez** ki baat karta hai — jo motor jal kar aaya hai, uska pura safar: aana, kholna, estimate, approval, banana, ready, delivery aur bill.

JOB DRAFT INVOICE KYUN NAHI HAI

Motor 3 tareekh ko aata hai, 5 ko khola jata hai, 6 ko estimate banta hai, 9 ko approve hota hai aur hafte bhar baad bill banta hai. Agar ise ek adhoora bill maana jata, to wo pandrah din tak “unposted work” ki list mein khadka karta rehta — aur koi na koi use sirf khadka band karne ke liye post kar deta. Job ek *cheez* hai, koi adhoora document nahi.

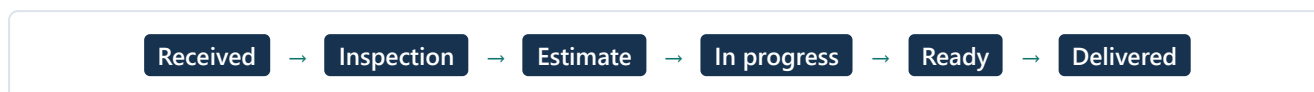

Motor andar lena

Module kholte hi **Whose motor, and when it came in** wala form khulta hai:

FIELD	KYA BHAREIN	NOTE
Customer	Kiska motor hai	Naya customer wahin bana sakte hain
Received	Kis din aaya	Zaroori
Brand / Model	Jaise <i>Crompton</i>	Optional
Rating (HP)	Jaise 7.5	Optional. Not known bhi chun sakte hain
Serial number	Casing par likha number	Optional lekin bahut kaam ka
Complaint	Customer ne kya bataya — jaise <i>Winding burnt, not starting</i>	Zaroori
Notes	Andar ki jaankari	Optional

Book it in dabate hi job ko ek number mil jata hai — jaise **JOB/26-27/41**. Yeh number turant milta hai taaki casing par sticker lagaya ja sake.

Job ka safar (pipeline)

STATUS	MATLAB
Received	Motor aa gaya, abhi khola nahi
Inspection	Khol kar dekha ja raha hai
Estimate	Quotation bana hai, customer se poochna baaki
In progress	Kaam chal raha hai
Ready	Ban gaya, delivery ka intezaar
Delivered	Customer le gaya — yahan kaam khatam
Cancelled	Customer ne mana kar diya. Kisi bhi adhoore stage se ja sakta hai

Do baatein khaas: **Ready se wapas In progress** ja sakta hai — *test run mein fail ho gaya, jo is trade mein aam baat hai*. Aur **Delivered aakhri hai** — *agle hafte wapas aane wala motor ek naya job hai, purana nahi khulta*.

Parts likhna

Job ke drawer mein aap wo parts likhte hain jo lagenge — bearing, copper wire, wagairah.

ZAROORI BAAT — PART LIKHNE SE STOCK NAHI HILTA

Job par part likhna sirf ek **note** hai ki kya bill hoga. Bearing shelf se tab jaati hai jab **invoice post** hoti hai.

Iska matlab: do jobs ek hi aakhri bearing par plan kar sakte hain. Yeh do fitters ke beech ki baat hai, aur application आपको us waqt roke ga jab bill post hoga.

Estimate aur approval

Estimate ek quotation hai — iski koi accounting entry nahi hoti. Customer ke haan kehne par use **approved** mark kar dein.

Agar aap estimate badalte hain, to uski approval apne aap hat jati hai. Jisne ₹1,200 par haan kaha tha, usne ₹1,800 par haan nahi kaha.

Job ka bill banana

- 1 Job ke drawer mein **Generate bill** dabayein.
- 2 Create wale hisse par bill ka form khul jata hai, jismein job ke parts lines ban kar aa jate hain.
- 3 Labour ki line, discount aur kaam kisne kiya — sab yahan add kar sakte hain.
- 4 Post karein. Ab yeh ek poori Sales invoice hai — stock hilti hai, GST lagta hai, customer ka udhaar banta hai.

DHYAAN RAKHEIN — LINES KO BINA ZAROORAT MAT CHHEDEIN

Agar aap bill ki lines ko haath nahi lagate, to bill banne par job ke parts **“billed”** mark ho jate hain — aur dobara bill nahi honge.

Lekin agar aap kisi line ka rate ya quantity badalte hain, to application yeh nahi keh sakta ki kaunsa part kaunsi line bana — isliye wo parts job card par **khule** reh jate hain. Post karne se pehle screen par ek banner yeh saaf bata deta hai. Yeh galti nahi, jaan-boojh kar chuna gaya surakshit raasta hai.

Ek lambe kaam ka **ek se zyada bill** ban sakta hai — pehle advance, phir delivery par baaki. Doosre bill mein sirf wahi aata hai jo pehle ke baad joda gaya.

NOTE

Job ka bill banne ke baad, uski **printable customer copy** abhi Jobs se nahi milti. Bill ka number aur total form ke upar dikh jata hai. Print ya share karne ke liye **Sales** module kholein, wahan list mein us invoice ko dhoondh kar drawer se Print/Share karein.

6.5 Expenses — Dukaan Chalane Ka Kharcha

Yeh kya hai aur Purchase se kaise alag hai

	MATLAB	UDAHARAN
Purchase	Jo bechne ya lagane ke liye kharida	Bearing, copper wire, motor
Expense	Jo dukaan khuli rakhne par kharch hua	Rent, bijli, phone, chai, transport

Yeh farak zaroori hai. Isi wajah se P&L आपको alag-alag bata pata hai ki dhanda kitna kamata hai (gross margin) aur uske baad kitna kharch jata hai (overheads). Dono ko mila dene se dono figures bekaar ho jati hain.

Kharcha kaise likhein

FIELD	KYA BHAREIN	NOTE
Date	Kab kharch hua	Zaroori
What it was for	Kharche ka account — jaise <i>Workshop Rent</i> . Naya account Accounting se banayein	Zaroori
Amount before tax	Tax se pehle ki raqam	Zaroori
GST	Sirf tab bharein jab claim kar sakte hain — warna khali chhod dein	Optional
Paid by	Cash / Bank / UPI / Cheque	Zaroori
Note	Jaise <i>March electricity</i>	Search mein milta hai

Record the expense dabate hi kharcha book ho jata hai aur cash/bank ghat jata hai.

TIP

Is module ki list mein **sirf expenses** dikhte hain. Sales aur purchase yahan nahi milenge — unki apni lists hain, aur saare posted documents ek saath dekhne ke liye **Insights → Day book** hai.

6.6 Transactions — Receipt, Payment aur Journal Voucher

Yeh kya hai

Yeh module do kaam karta hai jo aur kahin nahi hote:

1. **Wo paisa jo kisi ek bill se nahi juda** — jaise customer ne ek cheque se teen invoice clear kar diye, ya bill banne se pehle hi advance de diya.
2. **Journal voucher** — books sudharne ka aakhri hathiyar.

Ismein teen tabs hain: **Receipt**, **Payment** aur **Journal voucher**. Module **Receipt** par khulta hai, kyunki wahi sabse zyada istemaal hota hai.

Receipt — paisa aaya

FIELD	KYA BHAREIN	NOTE
Party	Kis customer se aaya	Zaroori
Date	Paisa kis din hila	Zaroori
Amount & How	Kitna aur kis tareeke se (Cash / Bank / UPI / Cheque)	Cheque ka number zaroori
Note	Jaise <i>Part payment against March invoices</i>	Optional

Kaunse bill par laga — allocation

Agar aap kuch nahi batate, to paisa **sabse purane bill se shuru kar ke** lagta hai. Yeh aksar sahi hota hai, lekin phir bhi ek faisla hai — isliye form aapko saaf bata deta hai ki usne kya kiya, aur badalne ka button bhi

deta hai.

- 1 Receipt post karein.
- 2 Khali form ke upar ek line aati hai jo batati hai ki paisa kis-kis bill par laga.
- 3 Badalna ho to wahin se drawer kholein — ya baad mein list se us receipt ko kholein.
- 4 Drawer mein khule bills ki list hoti hai. Har bill ke saamne raqam bharein.
- 5 Save karein.

DHYAAN RAKHEIN

Allocation **poori ki पूरी बदल जाती है** — jo grid mein dikh raha hai wahi final hai. Isliye sirf badla hua nahi, *har* row jispar raqam honi chahiye, wo bhari honi chahiye.

Aur agar party ke khule bills hain, to allocation ko bilkul khali chhod kar save nahi kiya ja sakta — khali ka matlab server ke liye “sabse purana pehle” hota hai, “kahin nahi” nahi.

Payment — paisa gaya

Bilkul Receipt jaisa, bas ulta — vendor ko paisa dene ke liye. Wahi fields, wahi allocation.

Journal voucher — seedhi entry

Yeh accountant ka tool hai. Jab koi cheez kisi normal document se nahi ho sakti — jaise depreciation, ya koi purani galat entry sudharna — tab seedhe khaton mein entry ki jati hai.

FIELD	KYA BHAREIN	NOTE
Date	Entry ki date	Zaroori
Narration	Yeh voucher kis liye hai — jaise <i>Depreciation for the year on the lathe</i>	Zaroori. Baad mein padhne wale ke liye
Lines	Har line par: Account, Debit ya Credit, aur Memo	Kam se kam do lines
Counterparty	Agar yeh entry kisi party se judi hai	Optional

DHYAAN RAKHEIN

Debit ka total aur Credit ka total barabar hone chahiye, warna voucher post nahi hoga (`JOURNAL_UNBALANCED`). Yeh accounting ka sabse bunyadi niyam hai aur ise koi setting band nahi kar sakti.

KABHI NA KAREIN

Journal voucher se seedhe **Inventory** ya **Sales** mein entry mat karein, jab tak aap पूरी तरह na jaante hon ki aap kya kar rahe hain. Aisi entry ke peeche koi bill nahi hota, isliye stock ka register aur books alag ho jate hain, aur Insights ka reconciliation us farak ko har baar dikhata rahega.

YAHAN KOI DRAFT NAHI HAI

Receipt, Payment aur journal voucher — teenon mein “save as draft” nahi hai. Jo paisa hil gaya wo ek haqeeqat hai. Ek parked receipt ka matlab hota ek golak jo books se alag chalti rahe, jab tak koi use authorise na kare.

Staff aur Insights

7.1 Staff — Aapke Log

Yeh kya hai

Staff module mein wo log hain jo **aapke liye kaam karte hain** — kaun hain, kya milta hai, kaun kis din aaya, mahine ka kitna bana, aur kisne advance liya.

STAFF AUR USERS ALAG CHEEZEIN HAIN

Users = kaun software mein sign in kar sakta hai.

Staff = kaun payroll par hai.

Zyadatar fitters ne kabhi software chhua bhi nahi hota, aur owner ka beta jo counter par baithta hai uska login hai lekin salary nahi. Isliye yeh do alag lists hain.

YEH MODULE SIRF OWNER KO MILTA HAI

Yeh *bharose* ki baat nahi, **privacy** ki baat hai — kaun kitna kamata hai, yeh counter par baithne wale ko jaanne ki zaroorat nahi. Data entry role ke paas is module ka koi raasta nahi hai. Aur module ke andar bhi ek line hai: **advance dena aur payroll post karna** ke liye transactions likhne ka haq alag se chahiye, kyunki wahan asli paisa hilta hai.

Chaar section, ek card

Upar chaar tabs hain: **Staff**, **Attendance**, **Payroll** aur **Advances**. Har tab apne aap mein ek poora module ki tarah kaam karta hai — wahi create form, wahi “Show list”. Tab par click karne par hi wo section load hota hai, isliye jo workshop sirf attendance lagata hai wo payroll ka bojh kabhi nahi uthata.

Employee daalna

FIELD	KYA BHAREIN	NOTE
Name	Poora naam	Zaroori
Designation	Fitter, Winder, Helper — apni list se	Nayi designation Manage designations se banayein
Basis	Monthly salary ya Daily wage	Bahut zaroori — isse poora hisaab badalta hai
Rate	Mahine ka (jaise ₹18,000) ya din ka (jaise ₹550)	Zaroori
Joined	Kab se kaam shuru kiya	Zaroori
Phone / Email / Address	Contact	Optional
Notes	Jo yaad rakhna ho	Optional

DESIGNATION KI EK AUR KHOobi

Designation par ek setting hoti hai — kya is trade ka naam **bill par** aana chahiye. Jin designations par yeh on hai, unka ek picker Sales bill ke neeche aa jata hai ([Who did this work?](#)). Isse aap likh sakte hain ki motor kisne banaya. Nayi trade shuru karne par bas nayi designation banayein — picker apne aap aa jayega.

Monthly aur Daily — sabse zaroori farak

	MONTHLY SALARY	DAILY WAGE
Rate ka matlab	₹18,000 mahine ka	₹550 din ka
Mahine ki keemat	Rate, mahine ke dino par baanta hua	Rate × jitne din mark hue
Jo din mark nahi hua	Paid mana jata hai	Unpaid mana jata hai
Holiday / week off	Paid	Unpaid
Paid leave	Paid	Paid

UNMARKED DIN KA MATLAB KYUN ALAG HAI

Koi bhi workshop har roz attendance nahi lagata — Diwali ke hafte mein screen kholi hi nahi jati. Isliye payroll ko yeh tay karna padta hai ki *khali din* ka matlab kya hai:

Monthly — salary tab tak banti hai jab tak uske khilaf kuch record na ho. Khali din ko absent maanne se kisi fitter ki teen din ki tankwah kat jati, aur pata bhi use hi chalta.

Daily — dihaadi aane par banti hai, aur mark hi uska saboot hai. Khali din ko present maanne se pandrah din ki wo dihaadi chali jati jiska koi hisaab nahi.

Dono default us taraf jhukte hain jo pakdi jaye: kam paisa milne ki shikayat usi shaam aati hai, zyada milne ki kabhi nahi.

Attendance lagana

[Attendance](#) tab par ek din ki sheet khulti hai. Aage-peeche ke dino ke liye [Previous day](#) / [Next day](#) hain. Har aadmi ke saamne se uska din mark karein:

STATE	MATLAB
Present	Poora din aaya
Half day	Aadha din
Absent	Nahi aaya, aur paisa nahi banega
Paid leave	Nahi aaya, lekin paisa banega
Holiday	Chhutti ka din
Week off	Saptahik chhutti

Yeh chhah hi states isliye hain kyunki har ek se paisa badalta hai. “Late” ya “on site” jaisi cheezein sach to hain lekin paise par koi asar nahi daaltin — unhe yahan rakhna payroll ke input mein diary rakhna hota.

Advance dena

[Advances](#) tab se kisi ko advance diya ja sakta hai. Kaun, kitna, kaise (cash/bank/UPI) aur ek note.

ADVANCE EK UDHAAR HAI, KHARCHA NAHI

Advance dete hi wo **Staff Advance** naam ke asset khat mein jata hai — matlab wo paisa aapko wapas milna hai. Wo agle payroll mein kat kar wapas aata hai. Agar ise seedha salary kharcha maan liya jata, to kharcha do baar ginn jata: ek baar advance dete waqt aur ek baar mahina chalate waqt.

Screen par har aadmi ke saamne **Still out** dikhta hai — kitna advance abhi bhi unke paas hai.

Payroll chalana

- 1 **Payroll** tab par **Run a month** se mahina chunein.
- 2 Sheet ban kar aa jayegi — har aadmi ke liye: days paid, earned, recover (advance) aur net.
- 3 **Recover** column mein tay karein ki har aadmi ka kitna advance is mahine katega. **Yehi ek cheez hai jo aap tay karte hain** — baaki sab hisaab se aata hai.
- 4 Post karein. Ek hi voucher banta hai poore mahine ka.

PAYROLL MEIN KOI DRAFT NAHI HAI — AUR YEH JAAN-BOOJH KAR

Ek park ki hui payroll sheet un figures par bani hoti hai jo attendance register ke saath badalti rehti hain. Do hafte purani sheet khol kar koi aisa mahina pay kar deta jise teen baad ki absences pehle hi galat kar chuki hoti — aur wo purani figure bilkul utni hi sahi dikhti jitni nayi.

Isliye sheet **post karte waqt dobara ginni jati hai**. Screen par jo tha wo post nahi hota; sirf aapka faisla (kitna advance recover karna hai) carry hota hai.

Galti ho jaye to payroll run ko **reverse** kar dein — mahina phir se khul jata hai aur dobara chalaya ja sakta hai.

Payroll books mein kya karta hai

UDAHARAN

Ramesh ne August mein ₹5,000 advance liya. September mein unki salary ₹18,000 bani.

September ki payroll: kharcha poora **₹18,000** book hota hai, haath mein **₹13,000** diye jate hain, aur **₹5,000** ka advance khatam ho jata hai.

Advance ko kharche mein se ghata dene se aapka wage bill utna hi kam dikhta jitna aap apne staff ko udhaar dete hain — jo galat tasveer hai.

7.2 Insights — Business Kaisa Chal Raha Hai

Yeh kya hai

Ek hi card, jismein do zoom level hain. Pehle chhah tabs poochte hain “*kahin kuch galat to nahi, aur kahan dekhein*”. Aakhri chaar tabs jawab dete hain “*figure kya hai*” us insaan ko jo pehle se jaanta hai ki use kaunsi figure chahiye.

TAB	KYA BATATA HAI	KIS KAAM KA
Overview	Sabse zaroori figures, pichle period se comparison ke saath, aur “dhyaan dene layak” cheezon ki list	Roz ya hafte mein ek baar

TAB	KYA BATATA HAI	KIS KAAM KA
Sales	Kya bika, kaunse item par margin bana, kaunse customer, kitna discount diya	Pricing ke faisle
Purchase	Kya kharida, kis supplier se	Supplier ke faisle
Stock	Stock ki keemat, turnover, jo maal ruk gaya hai, kya mangana hai, count mein kitna kam/zyada mila	Kharidne ke faisle
Money owed	Kiska paisa kitna purana hai (ageing), collection kaisa chal raha hai, aur kiska credit aapke paas hai	Wasooli
People	Wage ka kharcha aur kisne kitna kaam kiya	Sirf Owner ko
Day book	Ek din mein kya-kya hua, purane se naye tak	Jab koi figure galat lage
Profit & loss	Aamdani, cost of sales, gross margin, overheads, net	Mahine/saal ke end mein
GST	Output aur input tax, rate ke hisaab se	Return file karte waqt
Parked drafts	Jo kisi ne shuru kiya aur khatam nahi kiya	Hafte mein ek baar safai

Period picker aur comparison

Upar ek period picker hai. **Har badi figure ke saath pichle utne hi lambe period ki figure bhi aati hai** — isliye ₹4,20,000 “₹4,20,000, up 18%” ban jata hai.

“Pichla period” utne hi dino ka hota hai, mahine ke naam ka nahi. 1–31 March se pehle wala window 29 January se 28 February hai — kyunki 31 din ko 28 din se milane par ek barabar chalti dukaan bhi 10% girti hui dikhti.

Overview ki exception list

Sabse kaam ki cheez. Ismein sirf wahi rows aati hain jinke peeche *sach mein* kuch hai — zero wali rows dikhti hi nahi. Har row apne tab ka naam bhi batati hai, taaki aap wahin se aage ja sakein.

Kuch cheezein jo dekhne mein alag lagti hain

AAP DEKHTHE HAIN	ISKA MATLAB
Labour margin % mein nahi hai	Ek ghante ka koi “cost of goods” nahi hota. Use ginn-ne se margin har jagah asli se behtar dikhta. Labour ki raqam poori report hoti hai, bas percentage sirf maal par bani hoti hai
Items margin ke hisaab se rank hote hain, sale ke nahi	Sabse zyada bikne wala aksar wo nahi hota jo rent nikalta hai
Discount ka total	Aksar wo sabse badi figure hoti hai jo owner ne kabhi dekhi nahi. 12% margin ke saamne 4% discount ka matlab hai profit ka ek tihai
Dead stock	“Kabhi nahi bika” aur “April se nahi bika” alag-alag dikhaye jate hain — pehla kharid ki galti hai, doosra ek part jo ab chalan se bahar hai

AAP DEKHTÉ HAIN	ISKA MATLAB
Overview par ek difference likha hota hai	Yeh document lines aur ledger ka farak hai. Wo tab aata hai jab koi journal voucher seedha Sales mein post kiya gaya ho. Yeh batata hai, sudharta nahi — aur zero hone par bhi likha jata hai, taaki aap “kuch nahi hai” aur “check hi nahi kiya” mein farak kar sakein

Money owed — ageing samajhna

Ageing batati hai ki kaunsa paisa kitna purana hai. Buckets aapke `payment due days` se bante hain (Settings mein).

DO BAATEIN JO CONFUSE KARTI HAIN

1. Ageing period filter se nahi badalti. March ka bakaya bill wahi hai jise yeh report dikhane ke liye bani hai. Period sirf collection efficiency par lagta hai.

2. Ageing aur party ka balance alag ho sakte hain. Ageing khule *documents* ginti hai; party ka balance *ledger* ginti hai. Agar koi cheque bina yeh bataye jama kar diya gaya ki wo kis invoice ka hai, to customer ka balance zero ho jayega lekin invoice khuli rahegi. Dono sach hain. Isliye ise ek worklist ki tarah dikhaya jata hai — ise chhupaya nahi jata, kyunki application yeh andaza nahi laga sakta ki cheque kis bill ka tha. Uska hal: us receipt ko kholein aur allocate karein (Section 6.6).

NOTE

Jo customer **zyada paisa de chuka hai**, wo kisi bucket mein nahi aata — wo alag se *credit held* mein neele rang mein dikhta hai. Use amber mein dikhana kisi ko us paise ke peeche bhej dena hota jo aapke paas hai.

Yahan koi figure “store” nahi hoti

Insights ki har figure usi waqt entries se ginni jati hai. Koi nightly report nahi banti aur na banegi — kyunki agar Insights ka number workshop ke apne P&L se alag ho jaye, to log dono par bharosa karna band kar denge.

Administration — Users, Roles, History

8.1 Users — Kaun Sign In Kar Sakta Hai

Yeh kya hai

Yahan aap apne staff ke **logins** banate hain. Yaad rakhein — yeh salary wali list nahi hai (wo `Staff` module hai). Yahan sirf wo log aate hain jo application chalate hain.

Naya user banana

FIELD	KYA BHAREIN	NOTE
Full name	Jaise <i>Ravi Sharma</i>	Zaroori
Email address	Jaise <code>ravi@workshop.in</code>	Zaroori — isi se sign in hoga
Password	Ek shuruaati password	Zaroori. User ko alag se batayein
Role	Aam taur par <code>DATA_ENTRY</code>	Isse tay hota hai ki unhe kya dikhega
Status	Active	Band karne ke liye badal dein — delete karne ki zaroorat nahi

List par kya dikhta hai

Har user ke saamne unka role, status aur **last sign-in** dikhta hai. Jo kabhi sign in nahi kiye unhe `Never Signed In` likha aata hai, aur jo band hain unhe `Cannot Sign In`.

TIP — KOI CHALA JAYE TO

Employee chhod kar jaye to uska user **delete mat karein** — status ko band kar dein. Aisa karne se wo turant sign in karna band kar dete hain, lekin History mein unka kaam ka record bacha rehta hai. Password bhool jaye to yahin se naya password de dein.

NOTE

Aap apne aap ko delete nahi kar sakte (`USER_SELF_DELETE`). Yeh jaan-boojh kar hai — warna workshop ke paas koi owner hi nahi bachta.

8.2 Roles — Kis Role Ko Kya Milta Hai

Yeh kya hai

Har role ki पूरी list, aur har role ke saath uske saare permissions. Owner ke liye yeh module **sirf padhne ke liye** hai — isliye ismein koi create form nahi khulta, seedha list khulti hai.

OWNER ROLE KYUN NAHI BANA SAKTA

Roles poore platform ke liye tay hote hain, ek workshop ke liye nahi. Agar ek workshop naya role banata, to wo har workshop ke liye ban jata. Isliye role banane ka haq platform admin ke paas hai.

System roles (OWNER, DATA_ENTRY, ADMIN) ko koi badal nahi sakta. Unke edit aur delete buttons **dikhte to hain lekin dabaye nahi ja sakte** — chhupaye nahi jate, taaki wajah wahin mile jahan sawaal utha ho.

Yeh module kab kaam aata hai

Jab koi kahe “mujhe yeh card nahi dikh raha”. Yahan se dekh lein ki unke role mein wo permission hai ya nahi — phir **Users** se unka role badal dein.

8.3 History — Kisne Kya Badla

Yeh kya hai

Ek hi filtered list — iske alawa kuch nahi. Na create form, na drawer, kyunki ek entry *khud hi* apni poori detail hai.

Yeh kya record karta hai — aur kya nahi

Yeh sawaal “kisne yeh figure badla” ka jawab nahi deta — kyunki **is application mein koi figure badalti hi nahi**. Posted transaction edit nahi hoti, ledger ki entry badalti nahi, aur galti sudharne ka tareeka ek ulti entry hai jo dono cheezein record par chhod jati hai.

Jo cheez *sach mein* chupke se badal sakti hai wo hai **master data** — aur History wahi record karta hai:

BADLAV	WO CHUPKE SE KYA KAR DETA HAI
Kisi party ka GSTIN badla	Unke bill GST return ke alag column mein chale jate hain
Koi supplier archive hua	Wo har picker se gayab ho jate hain, aur unhe payment karna mana ho jata hai
Kisi item ka GST rate badla	Purane bill nahi badalte (jo sahi hai) — lekin do quarter milane wale ko yeh jaanna zaroori hai
Financial year ya books start date badli	Har purani period report naye tareeke se kat jati hai
Kisi user ka role badla	Unki pahunch badal jati hai, aur iska aur kahin koi nishaan nahi hota

Filters

FILTER	KYA KARTA HAI
Kind of record	Workspace, account, party, item, variant, user — kis tarah ka record
What happened	Created / updated / archived / restored / deleted
Who made the change	Kis user ne
From / To date	Kis duration mein
Search	Record ya insaan ke naam se

NOTE

Is trail mein koi entry **badal ya mitaayi nahi ja sakti** — kisi ke bhi dwara. Isme kuch add karne ka koi button nahi hai aur ho bhi nahi sakta; entries khud-ba-khud banti hain.

8.4 Jo Abhi Available Nahi Hai

Do modules bane hue to hain lekin abhi **band** hain, isliye unke card dashboard par nahi dikhte:

MODULE	KYA KARTA	ABHI ISKA KYA MATLAB
Uploads	Bill aur receipt ki photo rakhna	Abhi paper bill ki photo application mein rakhne ka koi tareeka nahi hai. Kaagaz alag se sambhalein
Workshops	Platform par saare workshops sambhalna	Yeh platform admin ka kaam hai, workshop owner ka nahi

In dono ke alawa, kuch aur cheezein bhi jaan-boojh kar nahi banayi gayi hain. Yeh galtiyan nahi, faisle hain:

NAHI HAI	WAJAH
Quotation aur proforma invoice	Dono ki apni numbering aur apna lifecycle chahiye hota. Abhi “final nahi hua” ke liye draft invoice hai. Job ka estimate iska kaam kar deta hai
Delivery challan	Wo maal ko bina bill ke hilata hai — matlab ek doosri cheez jo stock ko chhedegi. Yeh khatra jaan-boojh kar nahi liya gaya
Purchase order aur GRN	Yeh tay karte hain ki stock kab hilta hai aur kis daam par. Inka aadha implementation na hone se bura hota
Recurring invoice aur payment reminder	Yeh scheduling ke kaam hain, accounting ke nahi
E-invoice / IRN	Iska apna alag milestone hai. Document mein zaroori sab kuch pehle se maujood hai
Unit conversion	Jaise “1 box = 12 pcs”. Agar yeh kabhi galat ho jaye to stock aur Inventory account dono chupke se kharab ho jate hain
Batch aur expiry tracking	Is trade mein zaroori nahi, aur stock ke record ko chhedta hai
Salary payable ledger	Payroll पूरी settle hoti hai. Aadha payables ledger na hone se behtar hai
Password reset email	Abhi password owner hi Users module se badal sakte hain

Kaam Ke Poore Tareeke — Step by Step

Ab tak humne module alag-alag dekhe. Is chapter mein hum poore kaam ko shuru se aakhir tak dekhenge — waise hi jaise wo asli dukaan mein hota hai.

9.1 Counter par ek bikri (cash mein)

Sales card → Customer → Items → Paid in full → Post → Print

- 1 Dashboard par Sales card kholein. Bill ka form saamne hai.
- 2 Customer ka naam type karein. Naya hai to + Add se wahin bana lein — sirf naam aur phone kaafi hai.
- 3 Item box mein cheez ka naam ya code type karein aur chunein. Rate apne aap bhar jayega.
- 4 Quantity daalein. Zaroorat ho to rate ya discount badal dein.
- 5 Aur cheezein hain to repeat karein.
- 6 Neeche Paid in full dabayein aur mode chunein — Cash.
- 7 Post the bill dabayein aur confirm karein.
- 8 Customer ki invoice copy khul jayegi. Print dabayein.
- 9 Preview band karein — form khali hai aur agle customer ke liye tayyar hai.

TIP

Line mein kai customer hain? Har bill ke baad form khud khali ho jata hai aur cursor customer wale box mein aa jata hai. Aapko list par jaane ki zaroorat nahi — ek ke baad ek bill banate rahein.

9.2 Udhaar par bikri, aur baad mein wasooli

DIN 1 — BILL BANANA

- 1 Sales form bharein, jaise upar.
- 2 Payment wale hisse mein On credit chunein — abhi kuch nahi mila.
- 3 Post karein. Ab customer ka outstanding utna badh gaya.

DIN 20 — CUSTOMER EK CHEQUE LE KAR AAYA

Do raste hain. **Kaunsa chunein, yeh is par depend karta hai ki customer kya keh raha hai:**

HALAT	KAHAN JAYEIN	KYUN
“Yeh March wale bill ka hai”	Sales → us invoice ka drawer → Collect payment	Paisa seedha usi invoice par lagta hai
“Yeh 50,000 rakh lo, hisaab mein”	Transactions → Receipt	Paisa purane bill se shuru kar ke lagta hai, aur aap baad mein badal sakte hain

- 1 **Transactions** → **Show list** se us receipt ko kholein.
- 2 Drawer mein khule bills ki list hai. Har bill ke saamne raqam bharein.
- 3 Save karein. **Yaad rahe** — jitni rows par raqam honi chahiye, sab bharein, kyunki poori list badal jati hai.

9.3 Supplier se maal aana

Purchase card → **Supplier** → **Lines + rate** → **+GST / incl check** → **Post**

- 1 **Purchase** card kholein.
- 2 Supplier chunein. Naya hai to wahin bana lein.
- 3 Supplier ke bill ki date daalein.
- 4 Har line ke liye item chunein, quantity daalein aur **rate supplier ke bill se dekh kar likhein**. Rate khali aata hai — yeh jaan-boojh kar hai.
- 5 **Rate ke bagal wala toggle check karein**. Agar supplier ka rate MRP-inclusive hai to **incl** karein, warna **+GST**.
- 6 Kitna paisa abhi diya, wo payment split mein daalein. Kuch nahi diya to **On credit**.
- 7 Post karein.

Post hote hi: stock badh gaya, naya average cost ban gaya, GST input record ho gaya aur vendor ko dena badh gaya.

POST KARNE SE PEHLE DO BAAR DEKHEIN

Rate aur **+GST/incl** — yeh do cheezein hi stock ka cost banati hain, aur galat ho jayein to unhe sudharne ka koi seedha tareeka nahi hai. Baaki sab kuch aasaani se sudhar jata hai.

9.4 Rewinding job — shuru se bill tak

Motor aaya → **Book it in** → **Inspection** → **Estimate** → **Customer approval**
→ **In progress + parts** → **Ready** → **Generate bill** → **Delivered**

- 1 **Motor andar lein**. **Jobs** card → customer, received date, brand, HP, serial number aur complaint bharein → **Book it in**. Job number mil jayega — casing par sticker laga dein.
- 2 **Kholein aur dekhein**. **Show list** se job kholein, status **Inspection** kar dein.
- 3 **Estimate banayein**. Drawer mein estimate ki lines bharein — parts aur labour. Status **Estimate** kar dein.
- 4 **Customer se poochein**. Haan kehne par estimate ko approved mark karein. Status **In progress** kar dein.
- 5 **Parts likhte jayein**. Jaise-jaise cheezein lagti hain, unhe job par likhte jayein. *Abhi stock nahi hilta.*
- 6 **Kaam khatam**. Status **Ready** kar dein. Test mein fail ho jaye to wapas **In progress** kar sakte hain.

- 7 **Bill banayein.** Generate bill dabayein. Parts lines ban kar aa jate hain. Labour ki line add karein, discount aur “kisne kaam kiya” bharein.
- 8 Payment split bharein aur post karein. *Ab* stock hilta hai.
- 9 Status Delivered kar dein.

TIP

Invoice print ya share karni ho to Sales module kholein, list mein wo invoice dhoondhein aur uske drawer se Print/Share karein.

9.5 Customer maal wapas laaya

- 1 Sales → Show list → us invoice ko kholein. Search mein customer ka naam bhi chalta hai — number yaad na ho to naam se dhoondhein.
- 2 Drawer mein Accept return dabayein.
- 3 Har line ke saamne likhein ki **kitna wapas aaya**. Poora bhi ho sakta hai, aadha bhi.
- 4 Post karein. Credit note ban gaya.

Ab: maal wapas shelf par (usi cost par jis par gaya tha), customer ka udhaar utna kam, aur us par liya gaya GST bhi wapas.

AGAR CUSTOMER NE PAISA DE DIYA THA

Credit note se unka balance *credit* mein chala jayega — matlab ab aap unke paise rakhe hue hain. Wo agle bill mein adjust ho jayega. Screen par yeh neele rang mein “in credit” dikhega, amber mein nahi.

9.6 Bill mein galti pakdi gayi

Sabse pehle yeh dekh lein ki bill ki halat kya hai:

HALAT	KYA KAREIN	RESULT
Abhi Draft hai	Bas edit kar ke post kar dein	Kuch bhi record par nahi aata
Posted, aur us par kuch bhi nahi laga	Correct dabayein	Purana reverse ho jata hai aur naya ban jata hai — ek hi step mein
Posted, lekin payment ya return lag chuka hai	Correct nahi milega. Pehle receipt ya credit note reverse karein, phir Correct karein	—
Sales invoice, aur beech mein us item ki nayi kharid aa gayi	Correct mana hoga. Credit note se maal wapas lein aur nayi invoice banayein	Do saaf documents, do sahi cost par
Bill पूरी तरह galat hai	Reverse karein aur naya banayein	Dono documents record par rehte hain

REVERSE AUR CORRECT MEIN FARAK

Reverse = sirf cancel. Aap naya bill khud banayein.

Correct = cancel aur naya bill, ek saath, ek hi step mein. Aapko purani lines dobara type nahi karni padti.

Dono mein purana record mitta nahi — wo “Reversed” ban kar list par rehta hai. Yeh accounting ka sahi tareeka hai: jo hua, wo record par rehna chahiye.

9.7 Stock take — maal ginn kar milaana

- 1 Shelf par jaa kar sach mein ginn lein.
- 2 **Stock** card kholein aur us variant ki row dhoondhein.
- 3 **Record a count** kholein.
- 4 **Count on the shelf** mein wahi number likhein jo aapne **ginn kar dekha** — farak nahi, poora number.
- 5 Date aur note bharein — jaise *Stock-take, March*.
- 6 Agar maal zyada nikla hai to uska cost bhi bharein.
- 7 **Post the correction** dabayein.

TIP

Stock take ke baad **Insights → Stock** kholein. Wahan dikhta hai ki kitna kam mila aur kitna zyada — **alag-alag**, ek doosre mein cancel kar ke nahi. Agar ₹40,000 kam mila aur ₹38,000 zyada, to yeh ₹2,000 ka nahi, *ginne ka* masla hai.

9.8 Mahine ke end ka kaam

KAAM	KAHAN	KYA KAREIN
1. Adhoore bill khatam karein	Insights → Parked drafts	Har draft ko post karein ya discard karein
2. Attendance poori karein	Staff → Attendance	Jo din reh gaye hain, unhe mark karein — payroll se pehle
3. Payroll chalayein	Staff → Payroll	Mahina chunein, advance recovery tay karein, post karein
4. Kharche daalein	Expenses	Rent, bijli, phone — sab
5. GST dekh lein	Insights → GST	Rate ke hisaab se output aur input tax
6. P&L dekh lein	Insights → Profit & loss	Gross margin aur net
7. Wasooli dekh lein	Insights → Money owed	Kaunsa paisa purana ho raha hai
8. Trial balance dekh lein	Accounting → trial balance	Accountant ko dikhane ke liye

DHYAAN RAKHEIN — ORDER GALAT MAT KAREIN

Attendance **hamesha** payroll se pehle poori karein. Payroll post karte waqt sheet dobara banti hai — matlab jo attendance uss waqt tak lagi hai, usi par paisa banega. Baad mein attendance lagane se posted payroll nahi badalti.

9.9 GST return ke liye figures nikalna

- 1 **Insights** kholein aur upar se period chunein — jis mahine ka return bhar rahe hain.
- 2 **GST** tab par jayein.
- 3 Rate ke hisaab se output tax (jo aapne liya) aur input tax (jo aapne diya) dikhega.
- 4 Neeche **reconciliation** dekhein — document lines aur ledger ke totals ka milaan.

AGAR RECONCILIATION MEIN FARAK DIKHE

Iska matlab hai ki kisi tax account mein **bina bill ke** koi entry gayi hai — lagbhag hamesha koi journal voucher. Yeh farak **batata hai, sudharta nahi**. Us journal voucher ko dhoondh kar dekhein ki wo sahi tha ya nahi. Return se pehle yeh dekh lena zaroori hai.

9.10 Naye employee ko system mein laana

Do alag kaam hain, aur dono zaroori nahi ki dono karne padein:

AGAR WO...	TO...	MODULE
Sirf bench par kaam karega	Sirf employee record banayein	Staff
Sirf software chalayega (jaise part-time accountant)	Sirf user banayein	Users
Dono — counter par baithega aur salary bhi lega	Dono banayein	Dono

Zaroori Shabd — Aasaan Bhasha Mein

Application mein kuch accounting ke shabd aate hain jo pehli baar mein samajh nahi aate. Yahan har shabd ka seedha matlab diya gaya hai — wahi jo aapke kaam ka hai.

10.1 Paise se jude shabd

SHABD	MATLAB
Outstanding	Jo paisa abhi lena ya dena baaki hai. Customer ke liye: unse kitna lena hai. Vendor ke liye: unhe kitna dena hai.
Receivable	Customers se lena baaki. Books mein iska khaata <i>Sundry Debtors</i> hai.
Payable	Vendors ko dena baaki. Books mein iska khaata <i>Sundry Creditors</i> hai.
In credit / Paid ahead	Unhone zaroorat se zyada paisa de diya. Ab paisa <i>aapke paas</i> hai, unka udhaar nahi hai. Iske peeche nahi padna.
Ledger	Kisi ek khate, customer ya vendor ke saare len-den ka poora record — date ke hisaab se.
Statement	Kisi party ka poora ledger, running balance ke saath. Wahi kaagaz jo aap customer ko dete hain jab wo poochte hain “mera kitna baaki hai?”
Allocation	Yeh batana ki jo paisa mila, wo <i>kaunse bill</i> ka tha. Nahi batane par sabse purane bill se lagta hai.
Ageing	Baaki paisa kitna purana hai — 30 din, 60 din, 90 din. Isse pata chalta hai ki kis customer ke peeche pehle padna hai.
Settlement	Paisa dena ya lena — Receipt aur Payment dono ke liye ek common shabd.

10.2 Accounting ke buniyadi shabd

SHABD	MATLAB
Account (khaata)	Ek dabba jismein ek tarah ka paisa jata hai — Cash in Hand, Sales, Rent, wagairah.
Chart of accounts	Aapke saare khaton ki list.
Debit aur Credit	Yeh “aana” aur “jaana” <i>nahi</i> hain — yeh bas baayan aur dayan column hain. Inka matlab khate par depend karta hai. Cash mein debit se cash badhta hai; Sales mein debit se sale ghat-ti hai. Aapko yeh yaad rakhne ki zaroorat nahi — application khud tay karta hai. Yeh sirf tab dekhna padta hai jab aap journal voucher likhein.
Journal entry	Ek balanced entry — ek taraf debit, doosri taraf credit, dono barabar.
Voucher	Ek document jiske peeche journal entries hoti hain — bill, receipt, payment, sab.
Trial balance	Saare khaton ke debit aur credit ka total, ek list mein. Sahi books mein dono total barabar hote hain.
Profit & loss (P&L)	Kitna kamaya aur kitna kharch hua — aur kitna bacha.

SHABD	MATLAB
Gross margin	Bikri minus beche gaye maal ki laagat. Yeh batata hai ki <i>dhandha</i> kaam kar raha hai ya nahi.
Overheads	Dukaan chalane ka kharcha — rent, bijli, salary. Gross margin se yeh alag rakha jata hai.
Net profit	Gross margin minus overheads. Aakhir mein jo bacha.
Balance sheet accounts	Asset, Liability aur Equity — yeh saal se saal chalte hain, P&L mein nahi aate.
Opening Balance Equity (OBE)	Go-live par aapka apna hissa. Jo bhi purana hisaab aap declare karte hain, uska doosra pehlu yahin jata hai.
Round off	Bill ko poore rupee mein karne par bache paise. Yeh ek asli khaata hai, sirf dikhawa nahi.

10.3 Stock ke shabd

SHABD	MATLAB
Item	Product ka <i>khandaan</i> — jaise “3-Phase Induction Motor”.
Variant	Wo asli cheez jo bikti hai — jaise “5 HP / 3 ph / 1440 RPM”. Stock aur price yahin par hote hain.
SKU	Variant ka apna short code — jaise <code>MOT-5HP-1440</code> .
HSN / SAC code	Sarkari code. Maal ke liye HSN, service ke liye SAC. Isse GST rate juda hota hai.
Weighted average cost	Shelf par pade maal ka <i>ausat</i> daam. Alag-alag daam par kharida gaya maal milkar ek average banata hai. Sirf maal aane par badalta hai.
COGS	Cost of Goods Sold — jo maal bika, uska cost. Yeh average cost se nikalta hai.
Reorder level	Itna reh jaye to <i>order kar dena chahiye</i> .
Minimum stock	Itne se neeche gaye to <i>abhi ja kar laana hai</i> .
Stock adjustment / count	Books ke figure ko shelf ki asli ginti se milaana.
Shrinkage	Jo maal ginti mein kam nikla — toota, khoya ya kabhi ginn-a hi nahi gaya.
Dead stock	Wo maal jo bahut waqt se bika hi nahi.
Turnover	Stock kitni tezi se bikta hai.
Negative stock	Books keh rahi hain ki shelf par minus maal hai. Yeh hamesha ek data ki galti hai — koi purchase entry rehni chahiye.

10.4 Tax ke shabd

SHABD	MATLAB
GSTIN	15 character ka GST registration number. Iske pehle do digit se state pata chalta hai.
Taxable value	Wo raqam jis par tax lagta hai — yani discount ke baad, tax se pehle.

SHABD	MATLAB
CGST + SGST	Jab kharidne aur bechne wale <i>ek hi state</i> mein hon. Tax do barabar hisson mein bat-ta hai.
IGST	Jab dono <i>alag state</i> mein hon. Poora tax ek hi line mein.
GST Output	Jo tax aapne customer se liya — sarkar ko dena hai.
GST Input	Jo tax aapne kharid par diya — claim kar sakte hain.
Place of supply	Yeh niyam ki maal kahan diya gaya maana jaye — isi se CGST+SGST ya IGST tay hota hai. Jis customer ka GSTIN nahi hai, unke liye aapka apna counter maana jata hai.
Inclusive of tax (incl)	Jo rate bola gaya usmein GST pehle se shaamil hai. Tax usi mein se nikala jayega.

10.5 Document ke shabd

SHABD	MATLAB
Draft	Likha gaya lekin books mein nahi gaya. Kuch bhi asar nahi hua.
Posted	Books mein chala gaya. Ab edit nahi hoga.
Reversed	Post hone ke baad cancel kiya gaya — ek ulti entry daal kar.
Credit note	Customer ka maal wapas aane par banta hai. Unka udhaar kam karta hai.
Debit note	Supplier ko maal wapas bhejne par banta hai. Unka dena kam karta hai.
Reverse	Ek posted document ko cancel karna, ulti entry se.
Correct (revise)	Ek hi step mein: purana reverse aur naya post. Lines dobara type nahi karni padtin.
Repeat	Purani invoice ki lines ek naye bill mein le aana. Purani invoice ko koi farak nahi padta.
Day book	Ek din mein jo kuch hua, purane se naye ke order mein.
Parked draft	Koi document jo shuru hua aur post nahi hua.

10.6 Staff ke shabd

SHABD	MATLAB
Basis	Aadmi ko kaise paisa milta hai — mahine ka (Monthly) ya din ka (Daily).
Designation	Kaam ka naam — Fitter, Winder, Helper. Yeh aapki apni list hai.
Advance	Salary banne se pehle diya gaya paisa. Yeh <i>udhaar</i> hai, kharcha nahi — agle payroll mein katta hai.
Recovery	Payroll mein advance ka wo hissa jo is mahine kaata gaya.
Payroll run	Ek mahine ki salary ka hisaab aur uski posting. Poore mahine ka ek hi voucher banta hai.
Gross / Net	<i>Gross</i> = jitna banaya. <i>Net</i> = advance kaat kar haath mein jitna diya.

SHABD	MATLAB
Attribution	Bill par yeh likhna ki kaam kisne kiya. Yeh sirf record ke liye hai — iska salary par koi asar nahi hota.

10.7 Application ke shabd

SHABD	MATLAB
Module	Dashboard ka ek card — jaise Sales ya Stock.
Workspace	Module ka poora screen — form ya list.
Drawer	Dayein se aane wala panel jismein ek record ki poori detail hoti hai.
Picker	Wo search box jisse aap customer ya item chunte hain.
Permission / grant	Kisi kaam ka haq. Role ke saath aata hai.
Archive	Chhupa dena — naye kaam mein nahi dikhega, lekin purana record bacha rahega.
Meta	Wo list jo form ko chahiye — categories, units, brands wagairah.

Common Galtiyan aur Unka Hal

11.1 Sabse aam galtiyan — aur unse kaise bachein

GALTI	KYA HOTA HAI	KAISE BACHEIN
Purchase par +GST / incl ulta lagana	Stock ka cost poore tax jitna zyada chadh jata hai — hamesha ke liye. Har baad ka margin galat, aur kahin koi warning nahi	Post karne se pehle toggle zaroor dekhein. Supplier ka bill MRP-inclusive hai to incl
Purchase par selling price daal dena	Average cost bhaari ho jata hai aur profit kam dikhta hai	Rate hamesha <i>supplier ke bill</i> se dekh kar likhein. Box khali isliye aata hai
Ek party ke do record banana	Ek balance do hisson mein bat jata hai, dono aadhe sahi lagte hain	Naam type karne par jo suggestion aaye, use hi chunein. Naam pehle se hone par application poochta hai — “haan” karein
Opening stock ko purchase bill se daalna	Pehla mahina bhaari kharid dikhta hai, purana GST dobara claim ho jata hai, aur ek jhootha supplier ban jata hai	Hamesha Opening balances module hi istemaal karein
Payroll se pehle attendance adhoori chhodna	Log kam ya zyada paisa paate hain	Payroll se pehle poore mahine ki attendance mark karein
Item ka GST rate 0.18 likhna	Bill par 0.18% tax lagta hai	Percentage likhein — 18 , 0.18 nahi
GST rate ka box khali chhod dena	Product category ke default par chala jata hai; agar wo bhi nahi hai to save nahi hoga	Rate saaf-saaf bharein. Exempt maal ke liye 0 likhein
Kharche ko purchase mein daalna	Gross margin galat ho jata hai — rent bhi “maal ka cost” ban jata hai	Bechne ke liye kharida = Purchase. Dukaan chalane ke liye = Expense
Receipt ko allocate na karna	Customer ka balance zero, lekin invoice ageing mein khuli	Receipt ke drawer se allocate karein (Section 6.6)
Job ki bill lines bina zaroorat badalna	Parts job card par khule reh jate hain aur dobara billable dikhte hain	Lines tabhi badlein jab sach mein rate ya quantity badli ho. Banner post se pehle bata deta hai

11.2 Error messages aur unka matlab

Stock se jude

MESSAGE	MATLAB	KYA KAREIN
STOCK_INSUFFICIENT “Only 5 pc available in stock...”	Aap jitna bech rahe hain, utna shelf par nahi hai	Pehle wo purchase bill daalein jo yeh maal laaya tha. Ya agar aapki dukaan aise hi chalti hai, to Settings mein Allow negative stock on karein

MESSAGE	MATLAB	KYA KAREIN
STOCK_ADJUSTMENT_VALUELESS	Aap aisa maal add kar rahe hain jiski koi keemat nahi bataayi gayi, aur jo kabhi kharida hi nahi gaya	Count record karte waqt What the found stock cost bharein
STOCK_VARIANT_ARCHIVED	Wo variant archive kiya ja chuka hai	Items module se use restore karein
STOCK_NOT_TRACKED	Us item par stock tracking on nahi hai (jaise labour)	Sahi item chunein, ya Items mein stock tracking on karein

Bill aur document se jude

MESSAGE	MATLAB	KYA KAREIN
REVISION_WOULD_RESTATE_COST	Is invoice ke baad us item ki nayi kharid aa chuki hai, isliye Correct karne se COGS badal jayega	Credit note se maal wapas lein, phir nayi invoice banayein. Iska koi bypass nahi hai
TRANSACTION_SETTLED	Is bill par payment lag chuka hai	Pehle wo receipt/payment reverse karein, phir Correct karein
TRANSACTION_RETURNED_AGAINST	Is bill par credit ya debit note lag chuka hai	Pehle wo note reverse karein
TRANSACTION_ALREADY_REVERSED	Yeh document pehle hi reverse ho chuka hai	Kuch karne ki zaroorat nahi — list refresh kar ke dekhein
TRANSACTION_IMMUTABLE	Posted document edit karne ki koshish	Correct ya Reverse istemaal karein
BILL_HAS_NO_LINES	Bill mein koi line nahi hai	Kam se kam ek item add karein
BOOKS_CLOSED	Date aapke books start date se pehle ki hai	Sahi date daalein, ya Settings mein books start date badlein
RETURN_EXCEEDS_REMAINING	Jitna maal bika tha usse zyada wapas liya ja raha hai	Quantity kam karein — drawer batata hai ki kitna wapas ho sakta hai

Party se jude

MESSAGE	MATLAB	KYA KAREIN
PARTY_NAME_TAKEN	Yeh naam pehle se hai	Application aapse poochega ki kya usi record par doosra role laga dein — aam taur par haan sahi jawab hai
PARTY_DUPLICATE_CONTACT	Naye vendor ka GSTIN <i>aur</i> phone dono kisi maujood vendor se milte hain	Wahi supplier hai to purana record istemaal karein. Sach mein doosri branch hai to alag address daalein
PARTY_GSTIN_DUPLICATE	Sirf chetavni — yeh GSTIN kahin aur bhi hai. Save ho gaya hai	Dekh lein ki yeh sach mein doosri branch hai ya galti se dobara ban gaya
PARTY_IN_USE	Is party ke saath len-den ho chuka hai, isliye delete nahi ho sakta	Delete ki jagah Archive karein
PARTY_ARCHIVED	Yeh party archive ki ja chuki hai	Restore karein, ya sahi party chunein

Account aur voucher se jude

MESSAGE	MATLAB	KYA KAREIN
ACCOUNT_CODE_OUT_OF_BAND	Code apne type ke range mein nahi hai	Sahi range ka number lein (Section 4.2 ki table dekhein)
ACCOUNT_CODE_TAKEN / ACCOUNT_NAME_TAKEN	Yeh code ya naam pehle se maujood hai — shayad kisi archived account par	Doosra number ya naam lein. Archived accounts bhi apna code rakhte hain
JOURNAL_UNBALANCED	Debit aur credit ke total barabar nahi hain	Lines theek karein — dono taraf ka total ek hona chahiye
JOURNAL_TOO_FEW_LINES	Voucher mein do se kam lines hain	Kam se kam do lines chahiye
ACCOUNT_SYSTEM_IMMUTABLE	Aap un 15 zaroori accounts mein se ek ko delete ya badalne ki koshish kar rahe hain	Naam badal sakte hain, delete nahi

Payroll aur staff se jude

MESSAGE	MATLAB	KYA KAREIN
PAYROLL_MONTH_ALREADY_RUN	Us mahine ka payroll pehle hi post ho chuka hai	Dobara chalana ho to pehle purani run ko reverse karein
PAYROLL_MONTH_NOT_STARTED	Aap aane wale mahine ka payroll chalane ki koshish kar rahe hain	Mahina shuru hone ka intezaar karein
PAYROLL_RECOVERY_EXCEEDS_GROSS	Advance ki recovery salary se zyada hai	Recovery kam karein — baaki agle mahine kaat lein
EMPLOYEE_IN_USE	Is aadmi ki attendance, payroll ya advance record ho chuki hai	Delete ki jagah archive karein

Sign-in aur permission se jude

MESSAGE	MATLAB	KYA KAREIN
AUTH_INVALID_CREDENTIALS	Email ya password galat	Dobara koshish karein. Yeh message dono ke liye ek hi hai — surakshit reason se
AUTH_ACCOUNT_LOCKED	Bahut baar galat password. Account thodi der ke liye band	Screen jitna waqt bataye, utna intezaar karein
AUTH_ACCOUNT_INACTIVE	Aapka user band kar diya gaya hai	Owner se kahein ki Users mein status Active kar dein
AUTH_FORBIDDEN	Aapke role ke paas is kaam ka haq nahi	Owner se role check karvayein
TOO_MANY_REQUESTS	Bahut tezi se bahut requests	Thoda ruk kar dobara koshish karein
PASSKEY_REJECTED	Passkey se sign-in nahi hua	Password se sign in karein aur passkey dobara add karein

Opening balances se jude

MESSAGE	MATLAB	KYA KAREIN
OPENING_ALREADY_IMPORTED	Bilkul yehi file pehle chadhayi ja chuki hai	Kuch karne ki zaroorat nahi — wo pehle se andar hai
OPENING_PLAN_HAS_ERRORS	File ki kuch rows samajh nahi aayin	Preview mein har galat row par wajah likhi hai. Sudhar kar dobara Check it karein
OPENING_STOCK_NEEDS_A_COST	Stock ki row mein unit_cost nahi hai	Har stock row ka cost bharein
OPENING_STOCK_SKIPPED	Us variant ka opening pehle se hai	Yeh warning hai, error nahi — wo row chhodi ja rahi hai
OPENING_COLUMNS_UNKNOWN	File ke column pehchane nahi gaye	Show me an example se sample dekhein aur waisa hi format banayein

11.3 “Yeh kaam kyun nahi kar raha”

PROBLEM	SABSE AAM WAJAH	HAL
Card dashboard par nahi dikh raha	Aapke role mein wo permission nahi hai — ya wo module abhi band hai (Uploads, Workshops)	Owner se role check karvayein
Upar wala search box kuch nahi karta	Wo abhi kaam nahi karta	Us module ka apna search box istemaal karein
Item picker mein cheez nahi mil rahi	Wo item archive hai, ya uska koi variant nahi bana	Items module mein dekhein. Variant nahi hai to picker ADD A VARIANT ke saath dikhata hai
Customer picker mein party nahi mil rahi	Wo archive ki ja chuki hai	Customers/Vendors mein Archived filter se dhoondh kar restore karein
Bill par tax nahi lag raha	Item ka GST rate 0 hai, ya HSN nahi bhara	Items module se us product ka rate theek karein. Purane bill nahi badlenge
Bill par IGST lag raha hai, CGST+SGST ki jagah	Customer ka state code aapse alag hai	Dono ke GSTIN check karein — state code unhi se banta hai
Stock ka figure galat lag raha hai	Koi purchase entry rehni hai, ya sach mein farak hai	Item drawer ka Stock History dekhein, phir count record karein
Correct ka button nahi dikh raha	Us bill par payment ya return lag chuka hai	Pehle usse reverse karein
Invoice ka share link nahi khul raha	Wo revoke ho gaya, ya invoice reverse ho gayi	Dobara share karein — naya link banega
Trial balance ke totals se rows match nahi ho rahin	Aap chart view par filter laga kar dekh rahe hain	Trial balance view par jayein — wahan filter hote hi nahi
Insights ka figure P&L se alag hai	Koi journal voucher seedha Sales ya Inventory mein post kiya gaya hai	Overview par likha difference dekhein, phir Day book se wo voucher dhoondhein

PROBLEM	SABSE AAM WAJAH	HAL
Job ke parts dobara billable dikh rahe hain	Bill banate waqt lines badli gayi thi	Yeh jaan-boojh kar hai. Un parts ko haath se hata dein ya alag se bill karein

11.4 Agar kuch sach mein galat ho jaye

KYA HUA	KYA YEH SUDHAR SAKTA HAI?	KAISE
Galat bill post ho gaya	Haan, aasaani se	Correct ya Reverse karein
Galat receipt post ho gaya	Haan	Reverse karein aur sahi banayein
Galat allocation	Haan, jitni baar chahein	Receipt ke drawer se badal dein
Galat payroll	Haan	Run ko reverse karein, mahina phir khul jayega
Stock ka figure galat	Haan	Count record karein
Galat customer par bill	Haan	Correct karein aur sahi customer chunein
Purchase par galat rate ya galat +GST/incl	Sirf turant	Agar us item par uske baad koi aur transaction nahi hui, to Correct kar dein. Agar ho chuki hai, to average cost ko seedhe sudharne ka koi tareeka nahi — accountant se salah lein
Opening balance galat post ho gaya	Mushkil	Opening transactions ko reverse karna padega. Accountant se salah lein

SABSE ZAROORI TIP

Is application mein **kuch bhi mita nahi**. Har galti ke saath uska sudhaar bhi record par rehta hai. Isliye ghabrane ki zaroorat nahi — sirf sahi tareeka istemaal karein (Correct ya Reverse), aur haath se ulti-seedhi journal entries se bachein.

FAQ — Aksar Poochhe Jaane Wale Sawaal

A · SHURUAAT KE SAWAAL

Q1. Mujhe kis screen se shuru karna chahiye?

Dashboard se. Wahi ek matra home page hai. Har module ka card wahin hai, aur card par click karte hi module usi page par khul jata hai.

Q2. Left side ka menu kahan hai?

Koi sidebar nahi hai, jaan-boo-jh kar. Navigation ka kaam dashboard ke cards karte hain. Wapas jaane ke liye upar **Home** dabayein, Escape dabayein, ya browser ka Back.

Q3. Module kholte hi form kyun khulta hai, list kyun nahi?

Kyunki module kholne ki sabse aam wajah kuch naya likhna hoti hai. List **Show list** ke peeche hai, aur uske button par records ki ginti bhi likhi hoti hai — to aapko form chhode bina hi pata chal jata hai ki peeche kitna hai.

Q4. Kuch modules seedha list par kyun khulte hain?

Kyunki unme kuch banaya hi nahi jata — **Stock**, **Insights** aur **History** sirf padhne ke liye hain. **Settings** ka ek hi record hota hai, isliye wo seedha form par khulta hai. Aur **Roles** owner ke liye sirf padhne ke liye hai.

Q5. Sabse pehle kya set karna chahiye?

Settings — khaas kar GSTIN, kyunki usse aapka state code banta hai aur usi se har bill ka tax type tay hota hai. Uske baad Accounting, phir Items, phir parties, aur phir Opening balances. Poora order Section 2.5 mein hai.

Q6. Kya main mobile ya tablet par yeh chala sakta hoon?

Haan. Cards, forms, tables aur drawers — sab chhoti screen ke hisaab se dhal jate hain.

B · ROZ KE KAAM KE SAWAAL

Q7. Bill banate waqt customer list mein nahi hai. Ab?

Picker mein hi **+ Add** hota hai. Wahin naam aur phone daal kar bana lein — aapko form chhodna nahi padta. Wahi form Customers module bhi istemaal karta hai, to record poora banta hai.

Q8. Item list mein nahi mil raha. Kya karoon?

Teen wajah ho sakti hain: (1) wo archive hai — Items module se restore karein; (2) uska naam alag likha gaya hai — code, SKU ya HSN se bhi search kar sakte hain; (3) product to hai lekin uska koi variant nahi bana — aise item picker mein **ADD A VARIANT** ke saath dikhate hain, wahin se variant bana lein.

Q9. Ek hi bill par kuch cash aur kuch udhaar — kaise?

Payment wale hisse mein jitna abhi mila utna likhein (Cash, Bank, UPI ya Cheque). Baaki apne aap udhaar ban jayega aur customer ke outstanding mein chala jayega.

Q10. Ek bill par teen tarah se paisa mila — kuch cash, kuch UPI, kuch cheque. Chalega?

Haan. Jitni chahein utni payment lines add kar sakte hain, alag-alag mode ke saath. Har mode apne khate mein jata hai, isliye aap cash till se, bank passbook se aur UPI app se alag-alag milaan kar sakte hain.

Q11. Bill post karne ke baad print kaise karein?

Post karte hi customer wali copy apne aap khul jati hai, jismein **Print** hota hai. Baad mein chahiye to Sales → Show list → us invoice ka drawer → Print. Print isi page se hota hai — nayi window nahi khulti, to pop-up blocker ka koi masla nahi.

Q12. Customer ko WhatsApp par bill kaise bhejin?

Invoice ke drawer mein **Share** dabayein. Ek link banta hai jise aap kahin bhi bhej sakte hain. Customer ko sirf invoice dikhti hai — aapka cost ya margin kabhi nahi.

Q13. Share link kab tak chalta hai?

Hamesha, jab tak aap use band na karein. Iski koi expiry nahi hai — customer invoice apne paas rakhta hai. Band karne ke liye revoke karein; uske baad wo link kabhi nahi khulega. Dobara share karne par *naya* link banta hai.

Q14. Ek hi customer ko wahi cheezein har mahine bechta hoon. Har baar type karoon?

Nahi. Purani invoice ke drawer mein **Repeat** dabayein — wahi lines ek naye bill mein aa jayengi, wahi rate ke saath. Purani invoice ko koi farak nahi padta.

Q15. Bill banate-banate koi customer aa gaya. Kaam bach jayega?

Haan. Adhoora bill apne aap save rehta hai. Aap doosra module khol kar wapas aayein — wahi bill mil jayega. Naya shuru karne ke liye **Start again**.

Q16. Job ka bill banane ke baad print nahi mil raha.

Job screen abhi customer copy nahi kholti — wo sirf bill ka number aur total dikhati hai. Print ya share ke liye **Sales** module kholein aur wahan list se us invoice ka drawer kholein.

Q17. Upar wala search box kaam kyun nahi karta?

Wo abhi active nahi hai. Har module ka apna search box hai jo poori tarah kaam karta hai — Sales mein invoice number, customer ka naam ya note se; Items mein naam, code, HSN ya SKU se; aur aise hi baaki jagah.

C · ACCOUNTING AUR BUSINESS KE SAWAAL

Q18. "Outstanding" ka matlab kya hai?

Jo paisa abhi lena ya dena baaki hai. Customer ke liye: unse kitna lena hai. Vendor ke liye: unhe kitna dena hai. Yeh figure kabhi store nahi hoti — har baar entries se ginni jati hai, isliye yeh kabhi galat nahi ho sakti.

Q19. Customer ka outstanding minus (negative) dikh raha hai. Iska matlab?

Unhone zaroorat se zyada paisa de diya — ab wo paisa *aapke paas* hai. Screen ise neele rang mein "in credit" likh kar dikhati hai, amber mein nahi, taaki koi galti se unke peeche na pad jaye. Wo agle bill mein adjust ho jayega.

Q20. Purchase aur Expense mein kya farak hai?

Purchase wo hai jo aapne *bechne ya lagane* ke liye kharida — bearing, wire, motor. Expense wo hai jo *dukaan khuli rakhne* par kharch hua — rent, bijli, phone. Yeh farak isliye zaroori hai kyunki isse P&L alag-alag bata pata hai ki dhandha kitna kamata hai aur uske baad kitna kharch jata hai.

Q21. Weighted average cost kya hai aur mujhe iski parwah kyun karni chahiye?

Yeh shelf par pade maal ka ausat daam hai. Aapne 10 kg copper ₹700 par liya aur 10 kg ₹800 par — ab 20 kg ka average ₹750/kg hai. Jab aap bechte hain to profit isi ₹750 ke hisaab se ginn-a jata hai, andaaze se nahi. Isi wajah se aapka margin sach dikhta hai. Yeh average sirf maal *aane* par badalta hai.

Q22. Meri Insights ki figure P&L se match nahi kar rahi. Kya kuch galat hai?

Zaroori nahi. Insights bill ki lines ginta hai, P&L ledger ginta hai. Jab har rupaya kisi bill se aata hai, dono barabar hote hain. Farak tab aata hai jab koi journal voucher seedha Sales mein post kiya gaya ho. Overview par yeh farak saaf likha hota hai — aur wo **batata hai, sudharta nahi**. Day book se wo voucher dhoondh kar dekh lein ki wo sahi tha ya nahi.

Q23. Ageing aur customer ka balance alag-alag dikh rahe hain. Kyun?

Dono alag cheezein ginn rahe hain. Ageing *khule bills* ginta hai; balance *ledger* ginta hai. Agar koi cheque bina yeh bataye jama kar diya gaya ki wo kis bill ka tha, to balance zero ho jayega lekin invoice khuli rahegi. Hal: us receipt ko kholein aur allocate karein (Section 6.6).

Q24. Debit aur credit yaad rakhne padenge?

Nahi. Roz ke kaam mein aapko yeh kabhi nahi chunna padta — application khud tay karta hai. Yeh sirf tab dikhta hai jab aap khud journal voucher likhein, jo ek accountant ka kaam hai.

Q25. Kya main koi purani date ka bill bana sakta hoon?

Haan, jab tak wo aapke **books start date** ke baad ki ho. Usse pehle ki date par **BOOKS_CLOSED** aayega.

Q26. Round off on karoon ya nahi?

Agar aapki dukaan poore rupee mein charge karti hai to on karein — counter par das paise nahi milte. On karne par bill ka total round hota hai, lekin taxable value aur GST bilkul nahi badalte, kyunki return unhi par bharti hai. Purane posted bills par koi asar nahi padta.

Q27. Ek hi party mera customer bhi hai aur vendor bhi. Do record banaoon?

Bilkul nahi. Ek hi record rakhein, jismein dono role hon. Naam type karte waqt agar wo pehle se maujood hai to application aapse poochega — “haan” kar dein. Do record banane se ek balance do hisson mein bat jata hai aur wo kabhi milaya nahi jata. Ek record par dono taraf ka len-den ek hi statement mein dikhta hai.

D · STOCK KE SAWAAL

Q28. Stock ka number seedhe kyun nahi badal sakta?

Jaan-boojh kar. Agar quantity seedhe type ki ja sakti, to stock ka register aur books alag ho jate aur milaan ka koi tareeka nahi bachta. Isliye badalne ka ek hi raasta hai: **Record a count** — jisse ek document banta hai jo dono taraf asar karta hai.

Q29. Count record karte waqt farak likhoon ya poora number?

Poora number — jo aapne shelf par ginn kar dekha. Farak application khud nikal leta hai. Yeh isliye hai ki ginne wale insaan ke paas hamesha “kitne hain” ka jawab hota hai, “kitne kam hain” ka nahi.

Q30. Stock negative dikh raha hai. Kya karoon?

Yeh lagbhag hamesha ek chhooti hui purchase entry hai. Us item ka **Stock History** dekhein — kya koi supplier bill daalna reh gaya? Wo daalein. Agar sach mein maal kam hai, to count record karein.

Q31. Application mujhe bill post karne se rok raha hai kyunki stock kam hai. Lekin maal to hai!

Matlab wo purchase entry abhi tak nahi hui hai. Do raste: (1) pehle wo purchase bill daalein — yeh sahi tareeka hai; ya (2) agar aapki dukaan aise hi chalti hai ki bill pehle bante hain aur supplier ka bill baad mein aata hai, to Settings mein **Allow negative stock** on kar dein.

Q32. Reorder level aur minimum stock — dono kyun?

Do alag sawaal hain. Reorder level = “ab order kar dena chahiye” (jaise 20). Minimum stock = “ab kaam rok kar laana padega” (jaise 5). Insights ka worklist bhi isi order mein hota hai — jo aaj lena hai wo pehle, jo is hafte plan karna hai wo baad mein.

Q33. Job par part likhne se stock kam kyun nahi hota?

Kyunki job par part likhna sirf ek note hai ki kya bill hoga. Bearing shelf se tab jaati hai jab invoice post hoti hai. Iska matlab do jobs ek hi aakhri bearing par plan kar sakte hain — yeh do fitters ke beech ki baat hai, aur application us waqt roke ga jab bill post hoga.

E · GALTIAN SUDHARNE KE SAWAAL

Q34. Posted bill edit kyun nahi hota?

Kyunki us bill par pehle se report chal chuki hoti hai, GST ginn liya gaya hota hai aur stock hil chuka hota hai. Agar wo chupke se badal jata, to har purani report jhooti ho jati. Isliye sudhaar ka tareeka **Correct** hai — jo purana reverse karke naya post karta hai, ek hi step mein. Dono documents record par rehte hain.

Q35. Correct aur Reverse mein kya farak hai?

Reverse sirf cancel karta hai — naya bill aapko khud banana padega. Correct dono kaam ek saath karta hai, aur purani lines form mein wapas le aata hai, to aapko dobara type nahi karna padta.

Q36. Correct ka button gayab ho gaya hai. Kyun?

Us bill par kuch lag chuka hai — ya to payment, ya credit/debit note. Agar bill cancel ho jata, to wo receipt ya note ek cancel ho chuke bill par lagi reh jati. Pehle usse reverse karein, phir Correct milega.

Q37. Sales invoice Correct karne par “cost restate” wali error aa rahi hai. Ab?

Iska matlab hai ki us invoice ke baad us item ki nayi kharid aa gayi hai, jisse average cost badal gaya. Reverse karne par maal purane cost par wapas aata aur nayi invoice naye cost par jati — dono cancel nahi hote, aur farak COGS mein chhup jata.

Sahi tareeka: **credit note** se maal wapas lein, phir **nayi invoice** banayein. Iska koi “phir bhi karo” button nahi hai, aur yeh jaan-boojh kar hai — negative stock ko to koi maan kar theek kar sakta hai, lekin “pichle quarter ki COGS ab alag hai” par koi razamandi nahi de sakta.

Q38. Purchase par galat rate daal diya. Kya sudhar sakta hai?

Agar us item par uske baad koi aur transaction nahi hui, to **Correct** se sudhar jayega. Agar ho chuki hai to average cost ko seedhe theek karne ka koi tareeka nahi hai — kyunki average koi column nahi, movements ka jod hai. Isliye purchase post karne se pehle rate aur +GST/incl toggle zaroor check karein.

Q39. Galti se do baar same bill post ho gaya?

Aisa aam taur par hota nahi — agar network ki wajah se aapne dobara koshish ki, to application pehchan leta hai aur ek hi bill banta hai. Agar phir bhi do alag bill ban gaye hain, to ek ko **Reverse** kar dein.

Q40. Reverse kiya hua bill list se hat kyun nahi jata?

Kyunki is application mein kuch mitta nahi. Wo “Reversed” likha hua list par rehta hai. Uske saath ulti entry bhi record par rehti hai. Yehi ek sahi accounting record hai — jo hua wo dikhna chahiye. Reversed bill par koi action nahi milta, print bhi nahi, aur uska share link bhi apne aap band ho jata hai.

F · STAFF AUR PAYROLL KE SAWAAL

Q41. Staff aur Users mein kya farak hai?

Users = kaun software mein sign in kar sakta hai. Staff = kaun payroll par hai. Zyadatar fitters ne kabhi software chhua bhi nahi hota, aur counter par baitha owner ka beta login rakhta hai lekin salary nahi. Do alag lists.

Q42. Kisi ki attendance mark nahi ki. Uska paisa kya banega?

Basis par depend karta hai. **Monthly salary** par khali din *paid* mana jata hai — salary tab tak banti hai jab tak uske khilaf kuch record na ho. **Daily wage** par khali din *unpaid* mana jata hai — dihaadi aane par banti hai, aur mark hi uska saboot hai.

Q43. Payroll ko draft mein save kyun nahi kar sakta?

Kyunki wo sheet attendance par bani hoti hai, aur attendance badalti rehti hai. Do hafte purani sheet khol kar koi aisa mahina pay kar deta jise baad ki absences pehle hi galat kar chuki hoti — aur wo purani figure bilkul utni hi sahi dikhti. Isliye sheet post karte waqt dobara ginni jati hai.

Q44. Payroll post karne ke baad attendance badli. Kya karoon?

Run ko **Reverse** kar dein — mahina phir khul jayega. Attendance theek karein aur dobara chalayein.

Q45. Advance salary ka kharcha kyun nahi ginn-a jata?

Kyunki wo abhi kamaya nahi gaya — wo ek *udhaar* hai jo aapko wapas milna hai. Wo agle payroll mein kat kar wapas aata hai. Agar use turant kharcha maan liya jata, to kharcha do baar ginn jata aur aapko kabhi pata nahi chalta ki staff ke paas kitna paisa pada hai.

Q46. Bill par likha “kisne kaam kiya” — kya isse unki salary badhegi?

Nahi. Yeh sirf record ke liye hai — kis aadmi ne kitna kaam nikala, yeh dekhne ke liye. Salary rate aur attendance se banti hai, aur uske alawa kisi cheez se nahi. Yeh jaan-boojh kar hai: agar throughput chupke se piece rate ban jata, to wage ke do alag source ban jate.

Q47. Nayi trade shuru ki hai — bill par uska picker kaise aayega?

Staff module mein **Manage designations** se nayi designation banayein aur uspar “bill par dikhaye” wali setting on kar dein. Picker apne aap Sales bill par aa jayega. Kisi deployment ki zaroorat nahi.

G · PERMISSION AUR SECURITY KE SAWAAL

Q48. Mere clerk ko Staff card nahi dikh raha. Bug hai?

Nahi, yeh design hai. Staff module sirf owner ko milta hai — privacy ki wajah se, bharose ki nahi. Kaun kitna kamata hai, yeh counter par baithne wale ko jaanne ki zaroorat nahi.

Q49. Main link seedha type kar ke koi module khol sakta hoon jo mujhe nahi dikhta?

Nahi. Card chhupana sirf screen ki baat nahi — server har request par wahi rok lagata hai. Yeh do alag jagah check hota hai.

Q50. Employee chhod kar gaya. Uska login delete karoon?

Nahi — status band kar dein. Wo turant sign in karna band kar denge, lekin History mein unka kaam ka record bacha rahega. Delete karne se wo record dhundhla ho jata hai.

Q51. Main naya role bana sakta hoon?

Owner nahi bana sakte. Roles poore platform ke liye tay hote hain — ek workshop naya role banata to wo har workshop ke liye ban jata. Aap Roles module mein har role ke permissions dekh sakte hain aur Users module se kisi ko koi role de sakte hain.

Q52. Password reset ka email kyun nahi aata?

Abhi email se password reset ka option nahi hai. Owner **Users** module se naya password de sakte hain.

H · AAGE KE / ADVANCED SAWAAL

Q53. Kya main data Excel mein nikal sakta hoon?

Kai screens par CSV download milta hai — jaise Insights ke panels aur Stock ki list. CSV Excel mein seedha khulti hai.

Q54. Ek job ke do bill ban sakte hain?

Haan. Lambe kaam mein aksar pehle advance ka bill banta hai aur delivery par baaki ka. Doosre bill mein sirf wahi parts aayenge jo pehle bill ke baad joode gaye. Ek hi part do baar bill nahi hoga.

Q55. Quotation ka feature kyun nahi hai?

Quotation ki apni numbering aur apna lifecycle chahiye hota, aur use invoice mein badalne ka ek step bhi. Abhi “final nahi hua” ke liye **draft invoice** hai, aur workshop ke kaam ke liye Jobs ka **estimate** theek wahi kaam karta hai — customer ki approval ke saath.

Q56. Bill ki photo kaise rakhein?

Abhi application mein iska koi tareeka nahi hai — wo module bana hua hai lekin band hai. Tab tak kaagaz alag se sambhalein.

Q57. “1 box = 12 pieces” jaisa conversion ho sakta hai?

Nahi, aur yeh jaan-boojh kar hai. Agar wo factor kabhi galat ho jaye, to stock aur Inventory account dono chupke se kharab ho jate hain. Har item ko usi unit mein rakhein jismein wo asli mein ginn-a jata hai.

Q58. Meri screen par purana data dikh raha hai. Refresh karoon?

Nahi. Jab aap kisi doosre module mein kuch likhte hain, to application khud jaan leta hai ki kaunsi screen purani ho gayi, aur agli baar us screen ko kholne par wo apne aap taaza data le aati hai. Refresh karne se aapka aadha bhara hua kaam ja sakta hai.

Q59. Do log ek saath kaam kar sakte hain?

Haan. Har user ka apna login hota hai aur sab ek hi books par kaam karte hain. Agar do log ek hi aakhri cheez bechne ki koshish karein, to sirf pehla bill post hoga aur doosre ko saaf message milega.

Q60. Mera data kitna surakshit hai?

Aapke workshop ka data doosre workshops se पूरी तरह alag rehta hai. Har permission server par bhi check hoti hai. Posted entries badli ya mitaayi nahi ja saktin, aur master data ke har badlav ka record **History** mein rehta hai — jise koi edit nahi kar sakta.

Quick Reference — Ek Panne Par

13.1 Kaunsa kaam kahan hota hai

AAPKO YEH KARNA HAI	YAHAN JAYEIN
Customer ko bill banana	Sales
Maal wapas lena (credit note)	Sales → invoice drawer → Accept return
Invoice print ya share karna	Sales → invoice drawer
Supplier ka bill daalna	Purchase
Maal supplier ko wapas bhejna	Purchase → bill drawer → Return to vendor
Motor andar lena	Jobs
Job ka bill banana	Jobs → job drawer → Generate bill
Rent / bijli ka kharcha	Expenses
Customer se paisa lena (kisi ek bill ka)	Sales → invoice drawer → Collect payment
Customer se paisa lena (khaate mein)	Transactions → Receipt
Supplier ko paisa dena	Transactions → Payment (ya Purchase drawer se)
Paisa kis bill par laga, badalna	Transactions → us receipt ka drawer
Seedhi accounting entry	Transactions → Journal voucher
Naya product banana	Items
Nayi category / brand / unit	Items → Catalogue setup
Stock kitna hai dekhna	Stock
Stock count sudharna	Stock → Record a count
Naya customer / vendor	Customers / Vendors (ya bill ke picker se)
Kisi ka statement dekhna	Customers / Vendors → drawer → Statement
Naya kharche ka khaata banana	Accounting
Trial balance dekhna	Accounting → Show list → trial balance
Attendance lagana	Staff → Attendance
Salary chalana	Staff → Payroll
Advance dena	Staff → Advances

AAPKO YEH KARNA HAI	YAHAN JAYEIN
Business kaisa chal raha hai	Insights → Overview
GST return ke figures	Insights → GST
P&L dekhna	Insights → Profit & loss
Din bhar ka kaam dekhna	Insights → Day book
Adhoore bill dhoondhna	Insights → Parked drafts
Kisne kya badla	History
Naya login banana	Users
Workshop ki settings	Settings
Purana hisaab andar laana	Opening balances

13.2 Keyboard aur navigation

KYA DABAYEIN	KYA HOGA
Escape	Ek level peeche: confirm → drawer → list → module → dashboard
Browser Back	Wahi — module band ho kar dashboard par
Home (topbar)	Seedha dashboard
Picker mein Up / Down	Result mein upar-neeche
Picker mein Enter	Chuni hui cheez lein

13.3 Status aur unka rang

KAHAN	STATUS	MATLAB
Document	Draft	Books mein nahi gaya
	Posted	Books mein hai, edit nahi hoga
	Reversed	Cancel kiya gaya, record par hai
Stock	Negative	Data ki galti — purchase entry reh gayi
	Out of stock	Zero — sabse pehle mangayein
	Below minimum	Farsh se neeche — aaj laayein
	Low stock	Reorder level par — is hafte order karein
	In stock	Theek hai

KAHAN	STATUS	MATLAB
Party	They owe / You owe	Amber — wasooli ya bhugtan baaki
	In credit	Neela — paisa aapke paas hai, peeche na padein
	Nil	Hisaab barabar
	— (dash)	Figure maangi hi nahi gayi — yeh zero nahi hai
Job	Received	Aa gaya, khola nahi
	Inspection	Khol kar dekha ja raha hai
	Estimate	Quotation bana, approval baaki
	In progress	Kaam chal raha hai
	Ready	Ban gaya, delivery baaki
	Delivered	Le gaye — yahin khatam
	Cancelled	Customer ne mana kiya

13.4 Payment modes

MODE	KAUNSE KHATE MEIN	ZAROORI JAANKARI
Cash	Cash in Hand (1010)	Kuch nahi
Bank	Bank Account (1020)	Reference achha rehta hai
UPI	UPI / Wallet (1030)	Reference achha rehta hai
Cheque	Bank Account (1020)	Cheque number zaroori hai
On credit	Koi nahi — udhaar	Party ka outstanding badhta hai

13.5 Role ke hisaab se kya milta hai

MODULE	OWNER	DATA_ENTRY
Sales, Purchase, Expenses, Transactions	Poora	Poora
Jobs	Poora	Poora (delete ke alawa)
Items	Poora	Dekhna aur banana (edit / delete nahi)
Stock	Poora	Dekhna
Customers, Vendors	Poora	Dekhna aur banana (edit / delete nahi)
Accounting	Poora	Sirf khaton ki list — koi figure nahi
Insights	Poora (People bhi)	Nahi
Staff	Poora	Bilkul nahi
Users	Poora	Nahi

MODULE	OWNER	DATA_ENTRY
Roles	Sirf dekhna	Nahi
Settings, Opening balances	Poora	Nahi
History	Poora	Nahi

13.6 Post karne se pehle — checklist

HAR PURCHASE BILL PAR

- ✓ Supplier sahi hai?
- ✓ Rate *supplier ke bill* se liya hai?
- ✓ **+GST / incl toggle sahi hai?**
- ✓ Quantity aur unit sahi hain?
- ✓ Kitna paisa abhi diya, wo bhara hai?

HAR SALES INVOICE PAR

- ✓ Customer sahi hai? Unka pehle ka udhaar dekh liya?
- ✓ Rate aur discount sahi hain?
- ✓ Kitna paisa mila, wo bhara hai?
- ✓ Kaam kisne kiya — likha hai (agar zaroori hai)?

PAYROLL POST KARNE SE PEHLE

- ✓ Poore mahine ki attendance mark ho gayi?
- ✓ Har aadmi ka basis aur rate sahi hai?
- ✓ Advance recovery tay kar li?

GST RETURN SE PEHLE

- ✓ Saare bill post ho gaye? (Parked drafts khali hai?)
- ✓ Insights ke GST tab par reconciliation match kar raha hai?
- ✓ Period sahi chuna hai?

13.7 Yaad rakhne layak paanch baatein

1

Refresh mat karein. Screen apne aap taaza ho jati hai. F5 dabane se aadha bhara kaam ja sakta hai.

2

Purchase par rate aur +GST/incl do baar dekhein. Yeh do cheezein hi stock ka cost banati hain, aur inhe baad mein sudharna sabse mushkil hai.

3

Ek party ka ek hi record. Naam pehle se ho to application jo poochta hai, uska jawab “haan” hai.

4

Stock hamesha count se sudharein. Number seedha type karne ka koi option nahi hai, aur nahi hona chahiye.

5

Galti ho jaye to Correct ya Reverse. Kabhi haath se ulti journal entry na banayein — jab tak aap accountant na hon aur poori tarah jaan na rahe hon ki aap kya kar rahe hain.
